Quality check | High

Hi,

It has been noticed that for all process under Quality Check menu takes more that 5-10 min to process.

Hello ,

I have checked the menus in live server. The time is consumed in fetching the large number of records from case table and qc table.

Also as per the coding there are sub-queries running to fetch the data which is causing the slowness.

Solution will have to change the queries and also check if the sub-queries can be removed, or change the entire logic of fetching the data.

Hi,

Okay.

Please check the issue on urgent basis, as we want to import field QC cases through this module.

This things are not the one which can be resolved urgent basis...

I think we have to less manpower to work on this at the moment.

And there is important decision that need to take by next week if all data need to be encrypted ... in that case all queries will need to re-write

So please wait....

TEAM HOLD ON THIS

Date & Time : 14-03-2019 05:24:PM

As discussed with Kailash sir,
added index to qc_case_id field of table tbl_cases_quality_check.

Query:ALTER TABLE `tbl_cases_quality_check` ADD INDEX(`qc_case_id`);

Please check issue solved or not.
