Product ID showing on PDF report | Emergency

---

Hi,

Product ID showing on PDF report

Template Name- NCML Finance Private Limited RL BV CPV

PDF design Name- NCML Finance Private Limited RL BV CPV

Case ID- 105049515 & 105049516

Hi,

Field1 is not proper field for Product.

It should be product\_id only.

As discussed with Kailash sir, it is found that

The product id provides product id (number) and

field1 provides product name and it comes from case table which contains predefined values.

so as per your requirement if product\_id should be product then:

1)It needs change in coding for extra table join condition

2)It will increase the load on database (due to extra join condition), every time when you generate pdf.

Please discuss with Kailash sir for further process if change is needed.

hi,

should i change product\_id to field1 in pdf export design to view product name

As discussed with Shaikh,

Field1 not connected with Product Master.

Product\_id is connected with Product Master, which we are using.

Its showing proper in web/app template, but on pdf it shows product id instead of product name.
