Bhavana Pachpande | Location tracking and active inactive id status in RES

Discussed with manas sir ,Abhijeet
for fe's live location tracking need API.

If suppose any reason lost mobile then need to deactivate userID so that we need to API checking ID status.

Mobile APP already have tracking so why you need duplicate service?

Web service is already there to track FE movement .

Please use same API.

Dear kailash sir,

we have checked saveFe log API, but this API track location after case submit,
The requirement is whenever Fe open res App that time live location will get track,
send continuous latitude longitude every 15 min till res is working on foreground,
They want know exact FE location while doing Case.

Hello sir,

Please check reply from PAMAC team, i think call to server after every 15 min from mobile app, can increase traffic to server. Is it ok ?
