live and archive database data keep policy

As per discussion with Pamac Team , below functionality need to develop

1) current server have only last 3 months data.

if Today's date is 27 Feb 2019 then live database have data of Nov 2018, Dec 2018 and Jan 2019.

2) Archive server have data of 6 month

if Today's date is 27 Feb 2019 then archive database have data of May 2018, June 2018, July 2018, Aug 2018, Sep 2018 and Oct 2018.

3) in azure images are storing so remove 3 months old images.

if Today's date is 27 Feb 2019 then remove images which are older than 1st Nov 2018.

4) only dedupe and archive related menu(2 menu search in archive and move from archive to live database) will be connected with archive database.

Above is applicable for both India and Dubai data.

Please confirm on above points

Date & Time : 16-09-2019 03:11:PM

Hello mam,

I have started to work on this point from today 16-09-2019. Please note any new task will delay the development finish date also.

Task :

1) Create a script and test and set as cron to take backup of tbl_cases and case history old data (2017,2018) and delete once backup is confirmed, before 6 months for both countries India and Dubai.

Delayed by half day for following reason :

Case issue as per email (Mon, 16 Sep 2019 13:54:04 +0530) by Sir Ganesh Sawant unable to proceed due to missing images from RES. Plus discussion with Shaikh for his task on R62 and C85 and L&T api remote session.

Posted By : Manas Dasgupta

Assigned To : Dipika Yedge

D196

Date & Time : 19-09-2019 11:18:AM

1) Delayed by half day on (18-09-2019) for following reason :

New post by Ganesh Sir D204 and as per discussion with Sir Kailash task was of high priority, task assigned to Sahikh but testing and issue fix was to be done again by me as he did not have live data access.

2) Delayed by full day on (19-09-2019) for following reason :

- i) LTFs discussion with Client for issues.
ii) Jayant and Shaikh task discussion (R70,D202 Walnut Api, D204 LTFs API)
iii) Check cron for sync not working out of memory issue.

Posted By : Manas Dasgupta

Assigned To : Dipika Yedge

D196

Date & Time : 20-09-2019 04:40:PM

3) Delayed by full day on (20-09-2019) for following reason :

-
- i) Check Jayant issue for Multiple Image upload.
 - ii) Discussion of Walnut api with client and PAMAC team.
 - iii) Discuss with Shaikh for R70 pdf assignment changes and queries.

Posted By : Manas Dasgupta

Assigned To : Dipika Yedge

D196

Date & Time : 23-09-2019 04:46:PM

4) Delayed by full day on (23-09-2019) for following reason :

- i) Prepare files for C83, Shaikh changes for Fe categorywise emp rate.
- ii) Discuss with Mam Dipika for R81 changes and also with Shaikh.
- iii) Check live DB for employee assign module id : 311648 for modified_id ,created_id and date as per discussion with Mam Dipika on phone.

Task end date will increase as error is found in current Case data and master data sync cron error : "out of memory".

Also for above main thread points (27-Feb-2019 11:54:32) will have to thoroughly discuss with Sir Kailash for creating or updating existing cron.

For now my task is :

Task :

1) Create a script and test and set as cron to take backup of tbl_cases and case history old data (2017,2018) and delete once backup is confirmed, before 6 months for both countries India and Dubai.

Posted By : Manas Dasgupta

Assigned To : Dipika Yedge

D196

Date & Time : 25-09-2019 04:56:PM

5) Delayed by full day on (24-09-2019) for following reason :

1) As per discussion with Mam Dipika start high priority task R81 update VT ids in : Fe Payout MIS, FE Payout Summary and FE Generate Payout.

Prepare files and update changes in local and live copy and push to live server also.

2) Discuss with Mam Dipika and check L&T api issue for case id: 105978123 , error : levelOfActivity out of pickliet value.

3) Discuss with Sir Kailash and Shaikh for new Quality Check changes as per redo and create new case to show Fe.

6) Delayed by full day on (24-09-2019) for following reason :

1) As per email from Mam Dipika update SMS password in constant file and webservice file for Auto SMS/Email module.

2) As per email from Mam Dipika prepare sql query and update case fileds for DCR activity, about 3400 cases.

3) Discuss with Mam Dipika and Jayant for R72 changes, new send to client change to be done.

Posted By : Manas Dasgupta

Hello mam,

Backup of 2015,2016 and 2017 cases from archive table and live table completed. Once azure sync process is verified will delete cases from live table for country India and case history also.

Please confirm. After this will start backup and sync of 2018 case data by send to client date for country India only.

Posted By : Manas Dasgupta

Assigned To : Dipika Yedge

D196

Date & Time : 30-10-2019 03:55:PM

Hello mam,

After Backup of 2015,2016 and 2017 cases from archive table and live table we have deleted cases of 2015,2016,2017 by created from live and archive table both to reduce db space today.

For restoration purpose we will check log file for above 3 years than find out which year/month zip sql file to be imported to system and fetch the required case id data.

For new backup of 2018 we will create a new table containing deleted case id and their send to client date so that we can find where the sql zip resides for backup.

Please confirm above process.

D196

Date & Time : 11-11-2019 05:53:PM

Manas it was agreed that more than 3 month old details will be removed from the online and get parked offline.

Please get the 2018 data sync with Azure and for going forward follow the process

Posted By : Manas Dasgupta

Assigned To : Ganesh Sawant

D196

Date & Time : 12-11-2019 11:36:AM

Ok sir, as per discussion with Sir Kailash , we will remove 2018 send to client done and not done case first using cron script and sync the backup .sql zip files in azure server.

For 2019 we will add logic in cron to remove 3 months old case data by send to client date from live and archive table both and backup .sql zip files in azure server.

This development and changes related to Db sync process and cron setup will be an ongoing process together with other task as other task are also at hand and of higher priority.

Already informed you over email about this.

If we receive space warning from server(80% full) then we need to remove image from server as per date wise(old data remove).

It is not possible to separate EBC images.

If you want to retrieve images then inform us.

Hi Kailash

Shimbi : post 2019 all data is removed from live and back server.

PAMAC : What is it mean ?

as per discussion below was confirmed by pamac but stopped later on.

1) current server have only last 3 months data.

PAMAC : Okay

2) Archive server have data of 6 month

All data should be available in Archive and PAMAC Will share feedback if in case of more than 6 month old data to be removed from the Archive, please share Qtrly details of the Archive data so that we can take confirmation from client and delete the data

Date & Time : 14-05-2020 04:39:PM

Kailash please answer ...

And I think there is small miss understanding

Archive means Archive Case DB

Its not azure cold storage, it has all data.

I am right Kailash?

(Kailash request you to be more clear on you points.)

Posted By : Kailash Kumawat

Assigned To : Ganesh Sawant

D196

Date & Time : 14-05-2020 05:31:PM

Yes all data is in azure in the form of sql files.

Data is removed from current working server.

It is difficult to have all data on archive database because this is also exist on current server and space will occupy.

Archive server is connected to application when you search case history

D196

Date & Time : 31-08-2020 04:11:PM

Hello Mam,

As discussed with Sir Kailash for restoration of case id of cases old than 2018 will have to do manually by searching all log files in azure server for every year and month, which will take some time.

For new cases from 2018, we will create a backup log table in live server to add the following details :
blog_id, case_id, backup_file_path, backup_date, case_fields_json (optional)

Here case_fields_josn will contain 3 fields in json format : created_date, send_to_client_date and fe_submit_date.

Note : We won't have have any backup of case history table.

This will require 4 days in development to be put and tested on live server, and also as such current 2018 backup process need to be halted at the moment.

If 2018 cases are not that frequently used we can proceed with the backup process but restoration of those case will take time.

Please discuss and confirm.
