Hello mam,

As discussed process will remain same as C126, only an additional checkbox will be added in Summary page design to enable the 2nd table format as shared above in docx file, where table will be generated as VT wise.

Hello,

Added **Show verification wise list** check box in summary master page.  
To differentiate between normal dynamic table and verification wise dynamic table.

Today there was some issue with laptop internet connection, so I was not able to work properly in first half.  
Issue was resolved by IT team in second half.

Hello maam,

**Please consider below points and confirm.**

As discussed to color the field in dynamic table. The field name should be field110(which is fixed in coding) and field value should contain name of the color (i.e red, green, blue) and according to that field value we will pick the color of the same.
