checkbox column with select option in Template Assignment

1.) insert a new row in 'tbl\_mst\_submenu\_meta'

```
INSERT INTO `tbl_mst_submenu_meta` (`meta_id`, `field_name`, `field_label`, `field_type`, `field_options`,
`field_validations`, `field_default`, `field_foreign_key`, `form_show`, `list_show`, `list_search`, `list_order`,
`DB_ORDER`, `onchange`, `dependon`, `field_row`) VALUES
(15, 'FE Submitted Is Compulsory', 'FE Sub', 27, 'Yes,No', 'required', '1', NULL, 1, 1, NULL, NULL, NULL,
NULL, NULL, 2);
```

2.) Run an Url with Verify function inside admin to create JSON

<http://pamac.demo/admin/verify/add/case>

3.) alter a new column in 'tbl\_mst\_case'

```
ALTER TABLE `tbl_mst_case` ADD `FE Sub` INT(11) NOT NULL AFTER `case_template_id`;
```

Still on working .....

To Add a new Column -

1. I just need to go 'tbl\_mst\_case\_meta'.
2. Where we add a new row with our details and select whatever we need.
3. After this, I moved in 'tbl\_mst\_case' to add a new column to store data in it.

4. Now hit the URL to update JSON file for those database changes

admin/master/verify/all\_master\_json/module\_name

5. After all this i updated controller file to with these lines :

```
if($fields['field_name'] == 'fe_submitted_is_compulsory')
{
    $values['fe_submitted_is_compulsory'] = $post['fe_submitted_is_compulsory'];
}

elseif(@$post[$fields['field_name']]!="")
{
    $values[$fields['field_name']] = implode("",$post[$fields['field_name']]);

    if (substr($values[$fields['field_name']], -1) == ',')
    $values[$fields['field_name']] = rtrim($values[$fields['field_name']],',');
}
}
```

And Task Complete ..

As Telephonic Discussion with Sandeep Sir,

I updated that field Value which stored in database with 0 and 1 is now showing in View page as a Yes or No output .

## Changes are updated in the country demo

Fot this i put a condition on

view -> admin -> master -> list.php

Line no. : 243 -254

With Condition ->

```
//new change for FE Submit checkbox foe YES / NO
```

```
if(@$module == "case" && $s['field_name'] == 'fe_submitted_is_compulsory')
{
    if($v[$s['field_name']] == '1' ){
        echo 'Yes';
    }
    else{
        echo 'No';
    }
}
```

Hi

Can i push changes in live test and live server. do i have confirmation. Is it tested ?

**Posted By :** Jayant Singh

D184

**Date & Time :** 20-12-2018 12:27:PM

yes, of course, please do it there. You already took so many time to put this on live.

**Posted By :** Bhavana Pachpande

**Date & Time :** 20-12-2018 12:31:PM

Hi,

Because you have closed the point and put on hold, also no confirmation from Mam Dipika and Sir Sandeep was given for this changes. I will upload this change as per your confirmation then.

**Posted By :** Jayant Singh

D184

**Date & Time :** 20-12-2018 12:34:PM

at least put this on test, till we didn't get any permission for live

**Date & Time :** 20-12-2018 12:50:PM

Hi,

As discussed, by default the flag should be "Yes"

**Posted By :** Jayant Singh

**Date & Time :** 20-12-2018 03:42:PM

As requirement, the database needs to update so here are those query :

```
UPDATE `tbl_mst_case_meta` SET `field_name` = 'fe_submitted_is_compulsory', `field_label` = 'FE Submitted is compulsory', `field_type` = 4, `field_options` = 'Yes,No', `field_validations` = 'required', `field_default` = NULL, `field_foreign_key` = NULL, `form_show` = 1, `list_show` = 1, `list_search` = NULL, `list_order` = NULL, `onchange` = NULL, `dependon` = NULL, `dropdown_blank` = NULL, `field_row` = 3 WHERE `meta_id` = 15
```

Update `tbl\_mst\_case` set `fe\_submitted\_is\_compulsory` = NULL

And also on change on view file which is in repo .

Please update these changes

**Date & Time : 21-12-2018 04:24:PM**

New update according to telephonic discussion with Sandeep sir...

In Template-> report creation -> Billing MIS

these points needed to update :

1.) `tbl_cases.case_status AS 'Case status',`

2.) `LEFT JOIN tbl_mst_case ON(`

`tbl_cases.client_id = tbl_mst_case.case_client_id AND tbl_cases.veriftype_id =  
tbl_mst_case.case_veriftype_id AND tbl_cases.activity_id = tbl_mst_case.case_activity_id AND  
tbl_cases.product_id = tbl_mst_case.case_product_id  
)`

3.) `WHERE (case when tbl_mst_case.fe_submitted_is_compulsory = 1 THEN`

`tbl_cases.country_id = 11 AND tbl_cases.delete_flag IS NULL END)`

`LIMIT 0, 100`

**Posted By : Jayant Singh**
