Import

---

Hi Kailash

We are facing an issue in the FE payout hence suggest you to work on the following

1. Pincode should be mandatory for all the case while importing cases in the RES
2. Pin code should be cross checked with Pin code master and if any pin code is not register in the pin code master then same should not be allow to import.
3. In the both scenario it should give pop to the user in case of pin code is not available in the import format / Pin code master.
4. cases which are not imported in the RES should be reflect in the one tray with reason
5. Once the pin code updated in the import format / master it should allow to upload the case.

Hello sir,

Point 1) Pincode should be mandatory for all the case while importing cases in the RES

**Reply :** This functionality is already present in the system. menu Template Design.

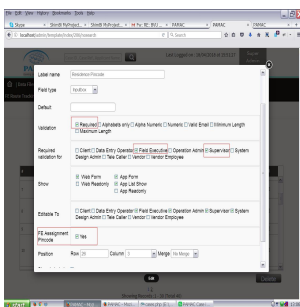

Here we have to check Validation : **required** and Required validation for **designation** for pincode field.

If their are multiple pincode files in the design template then if we want only one field which will be considered for getting Employee Rate, Client Rate etc, we have to also check the "**Fe Assign Pincode**" checkbox. Screenshot attached.

2) Pin code should be cross checked with Pin code master and if any pin code is not register in the pin code master then same should not be allow to import.

**Reply** : No such functionality present. Will have to check and do development.

Rest of the points will have to discuss in details.

Download

Hello sir,

Point 2, is done and uploaded on live server. Rest of the points are related to point 2 as such they are discarded. We are showing direct validation to user if pincode is not present in pincode master. User won't be able to proceed until , pincode is added in pincode master.

If this point is clear, can we close ?
