Fix fields not visible in app form | Medium

Hi,

The fields with field type as "fix" are not visible in the mobile application even when the app view is on.

Example:

Client - SCB PL BV

Field : field32

Field label: PREVIOUS EMPLOYMENT DETAILS (if worked elsewhere in last 5 years)

Please resolve.

Regards,

Navika

hi,

this needs to be closed.

Field operations are being affected.

When we set field type as "fix" then in the form it only shows label and its value but value is non editable it is only read only.

This issue we solved on Webpage and uploaded on demo site.

You need to change on mobile application too.

can you please check and confirm.
