Hello mam,

As discussed "Upload Deleted Image" sub-menu is modified now to send email to Server Admin "YRhost" to request images backup.

1) Please enter your email id and click on "Send Email" button.

2) The default email address if you do not enter your email id is "system@pms.resoftech.com"

This email id is created through resoftech.com and should not be altered or deleted as it will be used throughout the project.

3) When email confirmation is received from Yrhost, they are all stored in a folder named "backup_google"

As such you have to download the image using direct URL :

https://pms.resoftech.com/backup_google/image_name_here

and again use the "Upload Deleted Image" module to upload them in their respective case path.

For now, we follow this process later we will add a button which will automatically copy all searched images from backup to their respective case path after YRhost confirmation mail is received.

Please confirm on this process and also on the development part for new automatic upload from backup.

Hello,

Please use the below link to download images and upload them using menu

: Super Admin > Upload deleted

as requested on 01/06/2019. I have zipped all the files.

http://pms.resoftech.com/backup_google/backup_google_new.zip
