(All Members) | Dealy in Employee Assignment page load | Low

---

Hi

Please make note that there is lot of delay in the employee assignment page load. Probably there are 307360 rows due to which loading is taking time.

We suggest please delete the records for the inactive users which will reduce the count of the rows in the employee assignments and page may get load fast.

Hello sir,

As discussed with Shimbi team below are our queries , please respond.

Q1) Why there are so many in-active employees in Employee master ? Are they of any use ?

Q2) How long does employee assignment data remains after cases are completed i.e whole process till mis

generation and payout ?

Q3) Are we removing the employee assignment records once an employee work is done permanently or has left PAMAC, weather it is a Vendor, Inputter, Authorizer or company employee.

Q1) Why there are so many in-active employees in Employee master ? Are they of any use ?

Once employee left the organisation / transfer to other unit, we mark the user ID in active. There are users from 2015 onwards and there is no any option to remove the user from the master.

Q2) How long does employee assignment data remains after cases are completed i.e whole process till mis generation and payout ?

Please check from your end it may be till the Payout generation however please confirm if any in active user removed / delete will the old report and PDF generate with the user name

Q3) Are we removing the employee assignment records once an employee work is done permanently or has left PAMAC, weather it is a Vendor, Inputter, Authorizer or company employee.

No we are not removing the employee assignment record once an employee work in done or left the PAMAC

Hi bhavana

Ganesh has responded to your queries on 28/2/23. Yet this item is outstanding. May i know what is the catch.

We are checking it, will update here once done.

As employee ids are used in many other tables as FK.

Also **D231** Point No 83, has similar request for removing employees as per excel provided HDFC-Login deletion.xls

Is this bug related to that, remove employee data ?

**Date & Time :** 20-03-2023 07:39:PM

No - this one is a generic requirement and HDFC is a specific requirement.i

HDFC is as requested by client.

We are checking the impact on entire system, if we remove inactive records ..

As there are many in number, that is one reason of slowing down.

Also finding other possible issues

Hello sir,

Currently i am working on D266 and Prasad on C174, let me know if we can switch to this task on priority basis. Will update accordingly.

Also this task requires db access to Prasad as workbench in Prasad is not working for live India db connection. Prasad laptop IP address was also emailed to yrhost for the same to add filter, but still it did not work.

Do we need to arrange a anydesk meeting with yrhost and Prasad for this issue ?

Hello sir,

Below are the following findings as of today checked now -

- 1) Total Employee records found in table (tbl\_mst\_employee) - 39,265
- 2) Total In-active Employees found in table (tbl\_mst\_employee) - 23, 654
- 3) Total Employee Assign records found in table (tbl\_mst\_employeeassign) - 3,04,461
- 4) Total Employee Assign records found whose employee are in-active - 2,41,828  
(using relation between tbl\_mst\_employeeassign and tbl\_mst\_employee )

Hello team,

In-active employee records are removed from Employee Assign module, please check now and confirm.

Screenshot attached.

From what bhavana has given, i can see that there are over 2 lakh records in employee assign of inactive employees.

In my opinion, these 2 L + records can be deleted from the employee assign table.

With reference to deleting the inactive employees from employee master, we need to check whether this is used in case of old reports etc., which i doubt (because normally all query would have active status as active. Any way check with the reports where some of these inactive users are there. Will the report come or not. If there is no impact on the reports then we can think of removing these inactive users from tbl\_employee master also.

Now that the number of records have been reduced, please test and if the timeline is within reasonable time, close this discussion else let us check any other alternative

As discussed in the last meeting post adding the second server and indexing there is quite improvement hence, we are closing this threat as of now. However as suggested by Siddharth sir, work to be done on this threat at the time of upgradation.
