(All Members) | Assets that dont need db queries

---

Hello team

This thread will be used to discuss for optimization of application for recent issues related to high mysql usage in aws server -

Topic -

1) To find out queries which can be removed and use direct call from json file dump to fetch data instead of database. Mostly master related tables which change less frequently.

Menus where operations are high and used on daily basis -

-----

- 1) Import (with Dedupe Search)
- 2) Send to Client
- 3) Export
- 4) Multiple import
- 5) Case Verification List
