As per discussion with Sir Kailash ,

- 1) We will add a popup on click of field label added in the right box
- 2) This will allow us to rename the field label to a new one. This label will appear in the export report in Custom Reports.
- 3) This won't actually change the field label as in field master. It is for custom reports only.

Development will take 5 days, including testing , updation of files in local and demo copies. New field will be added to store the Newly added Label in custom report table.
