Cases data got blank | Emergency

Hi,

On receiving cases on the web system, the fields of the cases get blank and no data is received for 'Verified' cases.

For file existence we have checked some condition in webservice.

Because of this condition only files were getting updated.

We have been recovered the data from txt file which we are saving as a log for FE operation(submit case only).

txt file contains all data coming from mobile(related to that case) when FE requests to submit the case.
