Restriction of case view for client login

---

For 'Client' designation, the user should be able to see the cases for that client only. Also the misc search option (next to logo) should also show only the cases for that specific client.

I think it is working now, If you assign clients in employee assignment then that user will see only cases releaed with assigned clients. What you need extra?

The search option near the logo on top left, when a value is searched it gives results for all irrespective of the employee assignment of the user. How can we resolve this for client login?
