Dedupe | Medium

For dedupe, the software should not take the field value for dedupe if the value in import is NA,-,0, etc.

- 1) Can this be done?
- 2) How much time will this change take?
- 3) Can we edit the exceptional characters, ie add some more later?

For dedupe, the software should not take the field value for dedupe if the value in import is NA,-,0, etc.

- 1) Can this be done?

- Yes.

- 2) How much time will this change take?

- It will take 1 day for changes in coding. 1 day for uploading and testing.

- 3) Can we edit the exceptional characters, ie add some more later?

- Not understood. Need to discuss.

In addition to this,

Dedupe for mobilenno, offpf, resph, etc is checked for last 8 digits currently. Please change this to 7 digits.

Hello Manas,

I tested above module on demo site.

First import=> Candidate name= NA and Contact No=1234567890

Second import=> change other column value with above same value (Showing dedup error).

Third import => Candidate name= NA and Contact No= 1234667650 (Not showing dedup error)

Activity => EBC, Client=>KPMG, Product => None, Template Name=>KPMG-EBC RV, Case Type=>Fresh Case

Please check attachment .

 Template(8).xls[Download](#)**Posted By** : Manas Dasgupta

I shall prepare files and upload on live mirror copy first and then upload on live on monday (2-10-2017).

If it is urgent i can upload in live directly after making changes.
