Pincode valudation at the time of upload

Hi Kailash

As discussed over phone we wants to make the pincodes to be checked with pincode master at the time of upload of the cases and in case of any pincode is not available in the master message should be reflect as not uploaded please add the pincode in the master list.

Also it should show some tracker of the cases which are not uploaded in the RES

Hello Sir,

We will apply validation in case import, case multi import, case entry, case add , case verification edit and also in mobile(websservice) to check if FE Assign Pincode field as used in template has valid pincode according to pincode master.

Also this validation will not check any other pincode fields, only fe assign pincode field value will be checked. This fe assigned pincode field is used for emp rate and client rate validation.

Please confirm.

This change will be for both mobile and web application. Will make changes in demo server first and then upload on live server after confirmation.

Date & Time : 22-06-2018 04:21:PM

Hello sir,

I have uploaded changes on demo site for the following modules you can check Fe assign pincode field of any case will be now validated with pincode master:

- a) Case add,
- b) Case entry,
- c) Verification Edit,
- d) Import,
- e) Multi import.

In webservice api_live_2_2_test.php i have added a validation for Fe assign pincode field of case, but it will require Sandeep to make changes in app also accordingly.

Response for error from webservice for Fe assign pincode validation false to be handled in mobile app is : 5

```
$ret_arr = array(  
    'caseId' => @$caseId,  
    'caseOperationCode' => $caseOperationCode,  
    'errorCode' => '5',  
    'error' => TRUE  
);
```

Also a new field is added in the template as : 'assignment_pincode', this will be downloaded for every case now in mobile app. This field will be used for validation of Fe assign pincode field.

Date & Time : 29-06-2018 01:45:PM

As per discussion with Sir Kailash, we have reverted the changes back again.

We have uploaded the changes on live server as because you have mentioned on 28-Jun-2018 12:38:39

"Please go ahead and update the code on live **by** 2nd July 2018 early morning."

It was mentioned as "**by**" 2nd July 2018 not "**on**" 2nd July 2018.
