Point no.2(levels for validation 'required')

### Point : levels for validation 'required'

As per last comment updated by PAMAC team i.e.

"This has to be validation as per designation, on selecting required, option for selecting 'required' validation for which all designations".

Changes will as per given below :

1. In template design module(in add/edit field form) -

- If option of 'Required' validation is selected then below options will be designations(checkbox field) visible.

As per selection of designation required validation will be applicable in add/edit case form to that log in user.

Exa : If required validation is selected and in designation Sup is selected then required validation will be applicable in add/edit(both forms) of case forms to all sups.

If FE is selected then validation will be applicable in mobile app.

This was a part of non-critical task.

The above mentioned understanding is ok.

So when you spect us to do? I mean priority?

**Posted By :** Navika Desai

D103

**Date & Time :** 22-06-2016 09:54:AM

This is to be done after the critical tasks are done.

Timelines of non critical and their schedule is open yet.

D103

**Date & Time :** 22-06-2016 11:51:AM

Ok I am putting it on hold Rakhi, is there any dependency ?

**Posted By :** Rakhi Gaud

D103

**Date & Time :** 24-06-2016 08:46:AM

I have completed this point on local server and also uploaded changes on demo site.

Also there are some changes in webservice, we can test webservice changes at our end.

There is no dependency.

I will update it after testing on demo site.

**Posted By :** Navika Desai

D103

**Date & Time :** 24-06-2016 03:42:PM

If the development is already done (almost done), then lets not hold it.

**Posted By :** Rakhi Gaud

D103

**Date & Time :** 24-06-2016 04:15:PM

Yes development is done.

Only need to check with demo site apk(using webservice pamac\_webservice\_tv15).

Already checked with webservice pamac\_webservice\_v15, but there are some other changes(QC module) also under testing.

Web application changes are tested on demo site.

Please verify it.

Points to check:

Admin side changes:

1. Change in template design module- Add/edit field form
- Added new option to select designation for required validation.
- This option will be visible only if required validation is selected.

User side changes:

1. In add/edit case module.
2. In import module.

Required validation will be applicable to the selected designations only.

If no option(in designation) is selected then required validation will not be applicable.

**Posted By :** Navika Desai

D103

**Date & Time :** 24-06-2016 06:43:PM

Option visible in template design field add/edit module.

1) The designations are hard coded or the values are taken from master? As I need to understand whether the designation will reflect here or no if a new designation is added.

2) Validation for FE will be for web form or mobile form or both?

3) Even if any one designation has the field mandatory then it will by default show mandatory in template preview? and the validation will be applicable in case add & edit only?

Sandeep,

Discuss and check for mobile application if done and ready. And update me.

**Posted By :** Super Admin

Keep your conclusion ready so we proceed next

**Posted By :** Kailash Kumawat

D103

**Date & Time :** 27-06-2016 09:12:AM

It is good to ask these questions before start development.

because these will lead to extend delivery.

We can ask question only related with development point of view. but operational consequences you know better then us.

**Posted By :** Rakhi Gaud

D103

**Date & Time :** 27-06-2016 09:49:AM

Answers to queries posted by Navika.

Option visible in template design field add/edit module.

1) The designations are hard coded or the values are taken from master? As I need to understand whether the designation will reflect here or no if a new designation is added.

- values are taken from master, designation will reflect here if a new designation is added.

2) Validation for FE will be for web form or mobile form or both?

- for both(web form and app form).

3) Even if any one designation has the field mandatory then it will by default show mandatory in template preview? and the validation will be applicable in case add & edit only?

- It will show mandatory field as per designation selected in template preview page also because system check the designation of login user(to super admin no field will be visible as mandatory field because this designation is not added in designation master).

Validation will be applicable in add/edit form, case preview page and in import module.

@Sandeep :Thanks, I got demo site apk of webservice Tv15.

Today I will test it and confirm.

**Posted By :** Navika Desai

D103

**Date & Time :** 27-06-2016 11:26:AM

Thanks for the replies/confirmations Rakhi.

Point 2 tested ok on demo. Post on live to close as per time feasibility.

Kailash, this was not documented hence enquired for documentation.

Aside there are many queries/discussion/changes that the development team had not asked before development and are being asked now. Extend delivery is not acceptable. Any discussions which were not done earlier or which are in addition to the earlier discussed task list have been removed from development. You can yourself check in Myproject to confirm this.

It was agreed that all discussion were to be done and closed upon before development, which was not done. Whose miss out is this then?

Development team can ask several questions during development and operations team cannot ask even few question? Is this fair?

**Date & Time :** 27-06-2016 04:54:PM

@Sandeep :

Checked demo site apk of webservice Tv15.

There is no issue in functionality, only faced single error that "null pointer exception".

I will discuss it with you on call/skype.

**Posted By :** Sandeep Ghuge

**Date & Time :** 28-06-2016 06:05:PM

Hello Rakhi,

As per our call discussion on date 28-June-2016.

We will work on webservice "api\_live.php" on demo site for further enhance.

This webservice connected to latest optimized application.

I will share that application with you.

**Posted By :** Super Admin

D103

**Date & Time :** 29-06-2016 04:16:AM

Everything is not possible to ask before hand. It's not possible and we are not asking to extend deadlines. If we go with your rules, then every change you suggest will be taken only this round of development.

**Posted By :** Kailash Kumawat

D103

**Date & Time :** 29-06-2016 10:31:AM

should we upload it on live or not?  
our web-application changes are completed and ready to upload on live.  
due to APK we unable to upload.  
Which web-service we need to change on live, provide filename.  
once we upload on live you have to test it in APK.  
We are not responsible if mobile app not work due to this change.  
webservice versions are created in pamac side.

**Posted By :** Navika Desai

D103

**Date & Time :** 29-06-2016 12:03:PM

Agreed Sid sir, similarly every requirement in details cannot be decided before hand, we need to consider system limitations if any, practical ground realities of the user and other perspectives. You insisted on all changes and all discussion before hand, we debated and lost there. I do not decide the rules sir.

Kailash,

Please upload web application changes on live if it is so urgent, provided it does not affect the functionality as supporting changes will not be there in web services.

With regards to web service file, Sandeep is in discussion with Bhavana & Rakhi for web service changes for other points, hence suggest to have all changes implemented at one go.

I am surprised to hear the words 'we are not responsible if mobile app doesnt work due to this change' coming from our technical partner. Webservice changes and versions are created by PAMAC agreed, however with your consent only and that has been discussed many times.

Sandeep, please confirm if putting these changes in web application on live without supporting changes in web service & mobile application, will it effect the functioning of mobile application? Discuss with Kailash or me if required.

D103

**Date & Time :** 29-06-2016 04:39:PM

Hello Rakhi,

For this changes only needs to update in following webservice

for demo site : pamac\_webservice\_tv15.php.

for online site: pamac\_webservice\_v15.php.

You can check on demo site using shared demo APK which links to pamac\_webservice\_tv15.php demo site.

Update?

**Posted By :** Rakhi Gaud

D103

**Date & Time :** 08-07-2016 05:52:PM

Hello Sandeep:

I have copied code of live site webservice 'Pamac\_webservice\_v15.php' into demo site webservice 'Pamac\_webservice\_tv15' and checked existing given APK, which is working fine.

There is no error.

We have done with the testing from our end.

Please verify it once and confirm.

D103

**Date & Time :** 11-07-2016 05:56:PM

Hello Rakhi,

Please assign some test case so and also give me some brief info related test case so I can test.

**Posted By :** Rakhi Gaud

D103

**Date & Time :** 12-07-2016 03:06:PM

Hello Sandeep,

Following is the process for testing:

1. Make changes in template, set required validation to some fields(select FE designation) from template design module.Note down the fields which are required to FE.
2. Add sample cases of that template or you can also use existing cases
3. Assign cases of that template to FE.
4. Check the required validation(in mobile application) is applicable to those fields which are selected for designation FE(Field Executive).

**Date & Time :** 14-07-2016 04:20:PM

Hello Rakhi,

I checked this module in mobile application which links to 'Pamac\_webservice\_tv15.php' on demo site.

I make changes in "AXIS Bank CC BV" template for testing. And validation is working fine.

**Posted By :** Rakhi Gaud

D103

**Date & Time :** 14-07-2016 05:06:PM

Thanks Sandeep.

Please share the webservice name of live site apk to make these changes.

**Posted By :** Kailash Kumawat

D103

**Date & Time :** 18-07-2016 06:13:PM

We are waiting for webservice name.

Please provide tomorrow in 1st hour so we can close it tomorrow .

**Posted By :** Sandeep Ghuge

D103

**Date & Time :** 19-07-2016 10:59:AM

Live web service names

1) pamac\_webservice\_v15.php

2) api\_live.php

**Posted By :** Navika Desai

D103

**Date & Time :** 20-07-2016 10:35:AM

Rakhi,

As discussed, please do as below for putting this point on live site:

- 1) Upload the web related changes in the web application on live site
- 2) Upload the web service related changes in pamac\_webservice\_v15.php online
- 3) Share the web service file for api\_live.php offline on Myproject, Sandeep will upload the file on live later. We do not want any changes to api\_live file as we have few testing to be done with the changes that are in process.

Call for any clarification

**Posted By :** Rakhi Gaud

D103

**Date & Time :** 20-07-2016 11:37:AM

As discussed, please do as below for putting this point on live site:

- 1) Upload the web related changes in the web application on live site
- Done.

- 2) Upload the web service related changes in pamac\_webservice\_v15.php online
- Done.

- 3) Share the web service file for api\_live.php offline on Myproject, Sandeep will upload the file on live later. We do not want any changes to api\_live file as we have few testing to be done with the changes that are in process.
- Please find in attachment.

Tested above changes with case id 102222405.
