Deactivate DCR Activity

Hi,

We want to deactivate DCR activity, please add deactivate option on Activity List page.
we have deactivate all template, excel & pdf assignment.

Hi,

We can add activity status in list page of Activity.

Now if any activity is disabled then when a user(Except Super Admin) logs in he/she won't be able to see the De-activated activity in the Activity dropdown in dashboard page, which is required to proceed further.

Is this ok ?

Yes.

After the above development do we need to deactivate template, excel & pdf assignment also?

Ok..

When we can expect the above development on live server.

Tomorrow afternoon.

I will upload changes by the end of the day tomorrow.

First will upload in test server and then in live server once confirmed.

Hi, changes are uploaded in country demo server for both countries.

Now activity will have active/in-active in list page. If de-activated user on login won't be able to select the activity in dropdown when proceeding from dashboard.

This change is for both countries 11(India) and 12(Dubai).

Also, if activity is de-activated then this doesn't mean that it will be removed from any other dropdown used in search , report , etc. If we do that then it might cause error in count also values may disappear.

Only login is prevented for the user to proceed to that activity.

If a user has already selected the activity and proceeded to dashboard, and Admin has de-activated the login in the mean time then user has to logout and login again , so that the activity will be removed from the dropdown.

Please confirm.

Hi,

As discussed with Ganesh sir, deactivated activity should not seen in any report or any other dropdown used in search.

It should be visible only for Super Admin user.

There will be a lot of changes for this need to check every mis, dropdown and search, list page where activity is used and de-activate it.

Note : If any case related to this activity is closed and send to client is not done then it can cause issue. Please make sure de-activate activity once all the cases related to it are send to client and none of them are present in any list page.

For calculating number of days for development , i will first prepare a file for the modules where the changes are going to take place and based on that timeline will be decided.

Query : Also for now, should we upload the present changes for activity status and remove from dropdown in login dashboard in live server.

User at least for now won't be able to proceed to that de-activated activity.

currently i am working on this task with half day time, and it needs testing on every page wherever that is used, so it will take more time for testing. From observing the task it will take complete five days to test and make changes if allotted full day, otherwise if daily half day time leads to 10 days to complete this task. please reply.
