Show / Hide "save" button in import

---

Inside **DataFiles**, with **import** menu, we need to fill a form and upload a data file to save. But before we could directly save that to database

Now that save button will be hidden until we click on dedup search button. when we complete this we would be able to save those data into the database.

And this will work for both countries.

Hello Jayant,

As discuss with Ganesh Sir, Dedup mandatory only for India. Please make this changes only for India.

Hello Jayant,

After running Dedupe search after few times showing below screen for 248 cases.  
Please check it.  
If above count is mx then Let me know what will be maximum count for Dedup search .
