Pincode issue 6 times 0 (000000) | High

Hi Team,

It has been noticed that, user is updating pin code (000000) in import format, which is not available in pincode master, still case got close. Please check below case id

104678214

104678251

104678297

104685024

There was not any validation available for pin code entry 000000.

New Code is on working for all insert case

will be ready soon for live

=====

25- october -2018

=====

1472 -1480 Cases.php

4801-4806 cases.php

For Case Entry & new Case <- Verification

1602-1610 home.php

Now for DATA FILES

 Import:

Controller :

user / Home / import.php
 user / Home / importlist.php

Error-----

1.

```
if($assignPincode_present==0)
{
    $error[]="Please contact RES Vertical SPOC to update <b>Template design</b> with pincode field
    containing <b>FE Assignment Pincode</b> checked.";
}
```

Where:-

\$assignPincode_present=0; // Updated for Assign Fe pincode to be required in template

points :

- * For this we need FE Assign Pincode in import design
- * We also need verification type in excel form, so we need to allow verification type too.
- * when we FE Assign Pincode 123456 then the error says it is not available at line no 1. Please contact RES Vertical SPOC to update Pin code in Master with Rates.
- * After these we found that in Fe Assignment in the template does not have validation for Pincode 000000
- * Now I make that validation for pincode 000000

 Multi Import:

Controller :

1602-1607 user / Home / import.php
 3334-3340 user / Home / importlist.php

Error-----

1. The template was not showing in Dropdown

importtemplateassign_activity_id = 13

Hello,

I have updated changes for pincode validation "000000" for pincode fields which have "Fe Assign Pincode" or "Visited Pincode" field checked in live test server. It won't check for normal pincode fields.

Please check the following modules and confirm:

- 1) Import,
- 2) Multi-import,
- 3) Case Entry
- 4) New Case
- 5) Edit Case Verification.
