(All Members) | Images to be embedded in PDF and stored instead of images | Medium

Hi Ganesh

Post our discussion on the subject of embedding Images on to the PDF and store PDF itself, i discussed with Manas about 2 weeks back in a generic manner. He agreed that it is doable and would work better. However, this would mean quite a lot of changes in the application.

My question is :

- How often do we get request for old images (earlier 6 months and above and now 1 month and above).
- As now we are storing the images internally (not in Azure), retrieving and giving the image may not be very difficult task if the number of such requests is limited.

I therefore suggest that this change be deferred or kept on hold at this juncture (till the full upgrading) as we have many other issues in the pipeline.

I am just raising this change request to keep on record this requirement.

Request you to take a view on this and put this request on HOLD
