(All Members) | Assign activity menu | High

---

Hi Prasad,

As discussed please add Case detail MIS in assign activity menu.

As discussed this task will need changes in activity assign menu and check menu rights.

Process :

- 1) First we need to revoke(remove) all the rights assign to case detail MIS for all designation (except super admin and pamac admin).
- 2) Super admin OR pamac admin will assign case detail MIS menu through assign activity menu to whomever user need the case detail MIS .

-> Will first select Activity and then employee from dropdown, check all checkboxes for case detail MIS and click Save.

Accordingly for all activity, user has to assign using above process.

Hello,

**Before going live need to clear some things from our end.**

**Following are the scenarios when assigning case detail MIS report to a specific user.**

1) When we assign case detail MIS to a specific user, selecting the Activity name and Employee name.

He/She will get access of case detail MIS regardless of whatever activity he/she is logged in with.

**For eg.** Access is for CPV but the user can access it using RCU activity(inspect element in developer option), although menu will not be visible in header and also not accessible directly through URL(No direct URL access available).

Also no other user other than he/she will be able to access Case detail MIS. In short words we are giving access to the menu on user level and not on activity user level.

**Please make note of the same and give permission to push code on live server.**
