Ajit Kedare | API requirement Rupee5 client

Dear Manas,

As discussed, need to implement an API for new client (rupee5) process, client have the requirement of sharing the PDF report through API.

Please share your Queries so that same can be clarified from client, based on the clarification we can share back the timelines and effort estimates.

Hello sir,

1) To prepare pdf if we use send to client logic, then when summary page is present for that template then we have extra input fields as overall summary and remarks, which is taken from the Supervisor during the send to client process and before pdf generation. This won't work with api as we are not taking any supervisor input here.

2) If we use export module, the process after send to client then we can get the final pdf with summary details also for any activity.

3) When sending cases to client via standard api, all cases similar to send to client i.e of same ref no should be selected to generate the pdf report.

4) Will we create a pdf link accessible to client always that will have login id and password ?

5) Its is better to provide a link that will generate the pdf report, when link is accessed and not save the pdf in server, as we have to then add cron logic also to remove such pdf after certain time interval.

Development time will be added once queries are replied and current code is analyzed.

Hello sir,

As discussed today on con call for api requirement we have to send pdf link in api which is not present in current standard api .

This will add extra development which will require us to store the pdf file in server, so that we can share the link via api.

Client reply was that they would clear the processing of the api data within 30 days and such we can remove those pdf files from our server. In that case we have to create a cron script to check pdf report generated date and delete them accordingly.

Note :

We have also **suggested** client that we will send all the required data needed to generate the pdf document, which they will use to generate pdf at their end.

Client told us they will revert us back on this.
