Due to **B421**, it was pending and we need another excel file to compare with the recent file because me manas sir dint find anything which was in the query.

In Details, when we checked this we find that to get the value of zone and center there is dropdown and also we can add this in excel file. But according to mam with the help of Pincode, it gives center value in some other files. So we are waiting for that file and then we will find the issue through debugging at the same time with both files.

Hi,

Which file you need from me?

I have already attached import file while creating bug

As discussed with Manas Sir,

You had said that this feature is working on other excel reports and when we tried with our attached file, We did not find any way to see that center value comes through Pincode.

So we need another file from where center value get fetched by the Pincode.

Date & Time : 26-02-2020 12:03:PM

```
elseif($rec['center_id']!=" && $rec['zone_id']=="")
```

```
{
    $error[] = 'Zone is compulsory at line no ' . (@$rec['row_no']+1);
}
```

As you can see here, there is a condition which checks where if in excel file **CENTER** value is available and **ZONE** field is blank then it gives an error.

For this Bug, I am going to comment this part.

Please change this update on live manas sir too.

Hello manas sir,

please comment on those lines in the live server and inform Dipika mam to test and close

the Bug.

Hello Dipika mam,

as per discussed with Manas sir, We can give **zone and center** both value in excel sheet or we can put zone and center field empty at the same time. There is no need to change this logic for the given excel file.

Please modify the excel sheet otherwise we have to remove these validations from few more places too.
