Bhavana Pachpande | Digital verification | High

Hello,

The below changes are only to be made for client "**Team Space Financial Services**" :

In current digital verification process to upload images applicant have access to camera and also to gallery of mobile, which is not sufficient to justify verification.

Need to eliminate second alternative of uploading images through gallery.

So the change is to allow applicant to upload images only through camera and restrict access to gallery.

Hello,

As discussed with Ganesh sir and Dipika Ma'am, the change to disable gallery option is for all the client and also link can only be opened in mobile device.

As per my R & D and Discussion with Manas sir :

- 1) Images or any file input can't be compress on client side (**Due to security reason** - The only way to set the value of a file input is by the user to select a file).
- 2) The only way is to convert the file to base64 format (which is not appropriate for file greater than **1 MB** as it increases post value and makes it heavy).
- 3) The only way is to upload the file individually one by one using ajax.
- 4) So as per discussion will need more 2 days for point no.3 which require to make changes on server side.

Regards,
Prasad Gawade.

Hello,

One more point compression will be applied to only **images** and not to **pdf** files.

Hello,

As discussed with Dipika Ma'am.

- 1) Only image files will be compressed and not pdf file (for pdf, validation of file size will be applied[maximum 1 MB]).
- 2) Both images and pdf files will be uploaded by same method i.e by ajax (on user file select event files will be sent to the server) and later other form data when user will click on submit button.

Regards,

Prasad Gawade.

Hello, as discussed on email,

1) There was difference in latitude, longitude in rural areas for digital verification, so to reduce the difference to some extent and improve accuracy, code for GPS has been changed.

2) Please check and upload the changes on live server.

Regards,

Prasad C Gawade.
