Any specific reason for not informing us about the schedule decided?

I am receiving a reply 4 days later, when the task was supposed to be completed.

This needs to be closed immediately. We have business commitments and other operational activity basis this.

Please complete by this Monday 30th Apr. Work on Saturday also if required.

@Rakhi

There is no any option to create field in template as a file type PDF .

Like existing system "FILE" type used for image file .

So in template creation there is need to pdf file type using this In mobile application can understand what should upload image or PDF.

**Posted By :** Rakhi Gaud

D136

**Date & Time :** 04-05-2017 11:42:AM

There is no file type PDF. We have used the same field\_type = file for uploading PDF and Image. If you want Fe to distinguish between file and pdf us Different Lables.

Also there is no point in giving different option for PDF in field master , cause for image and pdf same field type will be used that is file. It will be simply redundant.

While submitting the form from mobile app with pdf attachment , we have to make changes in webservice to allow the pdf upload.

Today i shall make changes in webservice for allowing pdf file upload.

Webservice name : api\_live\_2\_2.php

Rakhi,

Different label will not help here. Sandeep is working on camscanner type function for pdf scan of documents. If the field type remains same, then how will the mobile app know whether to open a camera or pdf scanner.

Was this thought over?

**Posted By :** Rakhi Gaud

D136

**Date & Time :** 04-05-2017 12:04:PM

No, it wasn't mentioned earlier either.

Here we can check the label to open Camscanner. But need to use a fixed label for that. If we make changes for field type pdf it will take 6 days to make changes for webapp only. Changes will be affected in master also.

And as per telephonic discussion with Sandeep we shall upload webservice changes by 2 PM.

I have uploaded changes on demo server.

New Input Type added in Field Master as PDF.

For mobile app changes please use "field\_type == 30" for Uploading PDF document.

Test Data :

- 1) New Field added as "upload\_pdf\_1" using Field Master.
- 2) Filed name (label) : Upload PDF 1
- 3) This field is added in existing template of Axis Bank CC BV, RV, RT.
- 4) Fields was also added in Excel/PDF Export Design for same template.
- 5) Following case ID was used for testing to upload PDF:  
102084239

Please check.

- 1) Cannot upload on monday. As per discussion with Sir Kailash HTTP to HTTPS changes are to be done on live on monday.

2) Is mobile app testing done for PDF upload ?

3) For Doc file also we have to show URL like in case of txt file. Since anchor tags are not working in docx. Either pdf image can be shown only or only URL Link.

4) Will require 1 day to prepare files to upload in Live country demo site mirror copy and live local mirror copy and test there before putting directly on live.

1) Cannot upload on monday. As per discussion with Sir Kailash HTTP to HTTPS changes are to be done on live on monday.

- then do it on tuesday

2) Is mobile app testing done for PDF upload ?

-yes, mobile changes have been mentioned above. These will not affect case flow, hence changes can be done for live.

3) For Doc file also we have to show URL like in case of txt file. Since anchor tags are not working in docx. Either pdf image can be shown only or only URL Link.

- pdf icon or image? but as i understand, that will not be a hyperlink. Then the complete URL link to be shown

4) Will require 1 day to prepare files to upload in Live country demo site mirror copy and live local mirror copy and test there before putting directly on live.

- tuesday pls
