Hi,

what is 1st, 2nd and 3rd appointment fix date is there as there is only 1 field for appointment_date in table? hence can be used only once.

Hi,

Please specify search values if needed, such as which date range should be there for search and all other fields for search.

Hi,
as the query is in implementation process will take 2 days to complete upto countrydemo as some database optimization operation is also in progress.

(For Developer)

added new index to appointment details table for country 11 and its backup,

ALTER TABLE tbl_case_appointment_details
ADD INDEX idx_appt_case_id using hash (appt_case_id,appt_status);getting issue in 1st,2nd,3rd appointment fix dates [inprogress]

(Ops Team)

Hi,
Getting issue in columns: 1st Appointment Fix Date,2nd Appointment Fix Date,3rd Appointment Fix Date
issue: as there is only one field in cases table which stores only fixed date of appointment

As discussed with Deepika mam , only column 1st Appointment Fix Date is used and remaining removed from PD 1 report.
Added following new columns to above report design:

Center,
Client name,
Product name,
VT,
Added Date
[changes uploaded on countrydemo server please check and confirm for live.](#)
