Hello mam,

Changes are uploaded in demo server, please check and confirm.

Also note that image size doesn't auto adjust in cell, you have to drag cell to view adjust cell data if image is too big.

Hello mam,

Changes are pushed in live server for both India and Dubai, please check and confirm.

For images dynamic width and height fix in excel use :

****img_width_fieldName**** and ****img_height_fieldName****

Note: In above replace string **fieldName** is the field name in tbl_cases i.e the image field name

Ex: ****img_width_image1**** and ****img_height_image1****

Add them in the **td** tag in pdf design for **EXCEL FORMAT** as

width="img_width_image1**" height="**img_height_image1**"**

Check test case id : **105577827** (CPV - Axis Bank CC BV) in demo server for India login.
