TAT Calculation Search | Low

I am little confused TAT Master where i selected Client Drop Down for Search functionality.

It shows Two SBI which create confusion. When i check the Client Master SBI Client for Afghanistan and India.

Either You shows SBI (India), SBI(Afghanistan) else Take country name and shows clients against the dependency.....

In TAT master we have to check condition for client,activity and product. if for client,activity and product, template is exist then only those record will show in that drop down...

so after solving employee assign issue we will create this TAT master

Same time we need to check the TAT is added or not for the client. If TAT is added than we need to show in the Drop Down Box other wise dont show the Client name Drop Down Box at during the TAT Calculation.

I have did change in list of cases after search. List shows only those cases which has TAT hours.

but I have one query that is if we show only these type of cases then how will calculate TAT of those cases which dont have TAT hours, how we can export it.

Thanks,

Rakhi

I have did changes as per below:

1) Record which have TAT time will be visible in search list but will not have checkbox for selection to calculate TAT and TAT column shows "No TAT Time" text.

Please verify it.

Thanks,

Rakhi
