cron count image mismatch for date 29,30,31

As cross checked and downloaded images following result gathered:
 for images of month:10 (October) dates:16 oct to 31 oct
 following dates images count getting mismatch remaining dates images is correct.
 url: http://pms.resoftech.com/cron/count_images_livedir.php

date	live	local	diff
29	10192	9998	194
30	10975	9998	977
31	11150	9998	1152

Note: local images count and filezilla image count is matching properly.

filezilla can not show more than 10000 images.

live is proper.

please sort with date-wise and check images.

login into cpanel compress 29 folder into zip, download it on local and extract it.

hi,

ok let me check.

As discussed with Kailash sir, the there is no problem on live, its just server limit which displays only 9998 files not more than that.

reference : <https://forum.filezilla-project.org/viewtopic.php?t=39917>

so problem solved as follows:

-created zip

-downloaded zip to local

-delete zip from live server.

-Uncompress local zip file got proper file count matching with the cron count.

After above process found:

live	local	diff	zip file
10192	9998	194	same as live
10975	9998	977	same as live
11150	9998	1152	same as live

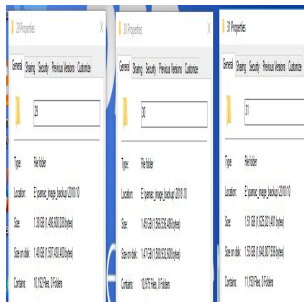

other solution for Cpanel Admin to change recursion (file display) limit:

<https://forums.cpanel.net/threads/pureftp-how-to-increase-file-limits-list-2000-entries.22879/>

or

<http://www.abdussalam.com/web-hosting/change-recursion-limit-file-limit-list-pureftpd-cpanel/>

can we close now?

compress 29 folder into zip, download it on local and extract it.

if count is matched with your script count then all images are downloaded.

please close this thread
