API between RES and EasyHR for the PMT updation

Hi Kailash

Please make note that we have EasyHR Software which we followed for updating the employee details like BIS, attendance, employee documentation and employee salary processing wherein there is one option for tracking the performance of the employee on daily basis (Performance Management Tracking) i.e. PMT.

As of now Team leader is collecting the details manually from the team of cases assigned and completed and tracking the same in the EasyHR which we want to automate through the API between RES and EasyHR.

In RES we have the daily cases assigned and completed details for Tele, Field , Supervisor (for supervisor cases assign is not there however completed cases details available same count to be considered as cases assigned). Daily Employee wise count of cases assigned and completed count to be pushed to EasyHR through the API

Please review the requirement and let we know timeline by when we can have the API between RES and EasyHR.

Similarly we would like to have API between EasyHR to RES wherein any new employee added in the EasyHR should be reflected in the RES employee details. Refer the below link for the reference.

<https://pamac.easyhrworld.com/api/v2/Pamac/getRes>

Awaiting time line to update the management

Posted By : Super Admin

D199

Date & Time : 08-03-2019 08:51:AM

I will discuss with Kailash and get back to you by Monday

Posted By : Ganesh Sawant

D199

Date & Time : 13-03-2019 10:38:AM

Kindly share the update as we have to respond to Ops accordingly

Posted By : Ganesh Sawant

D199

Date & Time : 15-03-2019 06:28:PM

Hi Sir

Please update as we are getting email reminders from Ops team

Posted By : Kailash Kumawat

D199

Date & Time : 18-03-2019 03:31:PM

RES will propose format of data for communication between RES and EasyHR.

RES application will initiate request for API.

Application want to send data of 18th mar 2019 then it will be send through api on 19th march 2019, Time will be set through settings.

API will not use any encryption.

Application will use JSON format for communication.

EmployeeID is common in RES and EasyHR.

Format will be

EmployeeID| Assigned cases| Completed cases

Application will share data for 3 designation(Supervisor,FE and Tele), it is fixed.

For FE and Tele, assigned date and case submit date are stored in database.

For Supervisor, assigned date and completed date will be same(send to client date), so both assigned and completed cases count will be same.

Engineers task

- 1) settings page for managing EasyHR url and time of cron/schedule job for initiating request(next day morning)
- 2) prepare assigned cases and completed cases report with EmployeeId
- 3) Design API with status and error codes (send email if error occur, to me and Ganesh sir)
- 4) Store data in database for next 7 days, (for checking if anything goes wrong)
- 5) testing on test server

This development will take 8-10 days depending on EasyHR response

Let me know your priority.

Posted By : Ganesh Sawant

D199

Date & Time : 27-03-2019 06:11:PM

Please start the working, we are co-ordinating with other team to share the link to push the PMT data

Posted By : Super Admin

D199

Date & Time : 28-03-2019 08:26:AM

Kailash first check with team for there work in hand and have clear time estimation from start date... make sure the developer how is doing this should not be influenced by any other sudden distractions

Posted By : Sandeep Ghuge

D199

Date & Time : 08-04-2019 12:35:PM

Purpose of PMT is :

PMT will update for three designation

- Supervisor

- Tele Caller
- Field Executive

Add this in headers section :

Accept:application/json,

Content-Type:application/json

X- API -KEY: 356a192b7913b04c54574d18c28d46e6395428ab

Api Link - <https://pamac.easyhrworld.com/api/v2/Pamac/pmtUpdation>

Post Key are :

- 1.code
- 2.pmt_date , format should be "YYYY-MM-DD"
- 3.behaviour_for_day
- 4.cases_assigned
- 5.cases_completed
- 6.error_count
- 7.training
- 8.reason

Kindly put the integer value for cases_assigned, cases_completed and error_count

Date & Time : 15-05-2019 06:01:PM

Today i was working with fetch the data threw URL and putting in our web page and tomorrow i will work on sending data threw example using AJAX and JSON.

After this i will be start this task.

Posted By : Ganesh Sawant

D199

Date & Time : 15-05-2019 08:23:PM

Hi Kailash

Please check this is not acceptable basis of your confirmation we had given target date to Ops, Now Ops following with us.

Posted By : Jayant Singh

D199

Date & Time : 16-05-2019 12:24:PM

As Discussed with Kailash Sir,

I have to start this from the date of 15/05/2019. And i also have some requirements for this which i will post in a while. Please let me allow for this

Posted By : Super Admin

D199

Date & Time : 17-05-2019 08:31:AM

started ?

Posted By : Jayant Singh

D199

Date & Time : 17-05-2019 04:02:PM

Yes Sir it is started.

Hello PAMAC Mumbai Team,

i was working with a test file and after this i discuss with **Manas sir** where we got few points.

Please Clear these points so that i put this on script:

- When supervisor case will be count as a close.
- Employee id will be primary Key or user login id.

- what about Date range for finding case history of that employee.
- This will be for country 11 or 12.

Hello Kailash Sir,

- settings page for managing EasyHR url and time of cron/schedule job for initiating request(next day morning).
- Store data in database for next 7 days, (for checking if anything goes wrong).

-----4 function i have to create :
Receive data,database connection, find data from country database, validation and query.

Posted By : Ganesh Sawant

D199

Date & Time : 17-05-2019 05:15:PM

Please confirm the deadline to complete the project as I have reply back to Management accordingly.

- When supervisor case will be count as a close. - Once case marked as Send to client
- Employee id will be primary Key or user login id. - User LOGIN id
- what about Date range for finding case history of that employee. - It may be daily, weekly and monthly
- This will be for country 11 or 12. - Please let we know what is 11 and 12. It should be for India

Posted By : Jayant Singh

D199

Date & Time : 20-05-2019 12:17:PM

I was working with local server but suddenly i got an issue with Apache server in wamp. Which needed to fix for completing my task.

So i have to reinstall wamp in my PC, Export all database in MySQL again, customization in wamp setting etc.

This process will took my whole day please give me today to fix this.

Posted By : Ganesh Sawant

D199

Date & Time : 21-05-2019 02:22:PM

Hi Kailash

Please check date is just getting extended, almost 3 months will get completed now for the request and it is still pending

Posted By : Jayant Singh

D199

Date & Time : 22-05-2019 03:17:PM

Hello Sir,

- Please provide us test server URL from easy hr so that we could send their data for testing otherwise this testing will effect on payout because of live URL.
- And we also needed JSON format from Easy HR to receive newly added employee in easy HR to sync with PMS.

* I am working on this sir please give me some time to make it properly.

Date & Time : 03-06-2019 08:45:AM
Hello,

Is testing done, can we go live for this change.

Posted By : Jayant Singh
D199

Date & Time : 10-06-2019 10:04:AM

According to new changes after discussion with Ganesh sir and easy hr team-

Last time I worked on that function (TASK), where I created three MySQL queries to fetch that data for fe,tele and supervisor and directly pushed data to our API URL but now due to new changes I am creating a new query where this will be dynamic and give data to received header's.Still i have few error to solve.

Posted By : Jayant Singh
D199

Date & Time : 11-06-2019 03:56:PM

Today when i almost completed my updated SQL query and coding part i got that i am getting very slow speed on processing for fetching data from MySQL.

Because of there so many queries were running at a same time.I tried to decrease this speed but not satisfied myself too. so i created once again three different - 2 queries and after this i put all data to curl according to those given header.

Now its working.

But testing is still remaining due to not any confirmation about our query on mail.

Please reply me regarding that mail so that i complete my testing part too.

Posted By : Jayant Singh

D199

Date & Time : 12-06-2019 03:43:PM

I got a mail reply from Ganesh Sir today, But when i checked again in POSTMAN using POST method, still there is no change in that issue.

I informed there on mail and there are some headers where i do'nt have idea what i give there please PAMAC MUMBAI team help me in this :

```
[code] => P53209  
[cases_assigned] => 2  
[cases_completed] => 0
```

are done but what they want here -

```
[pmt_date] =>  
[behaviour_for_day] =>  
[error_count] =>  
[training] =>  
[reason] =>
```

Posted By : Jayant Singh

D199

Date & Time : 14-06-2019 04:30:PM

Created another function for testing API . And it is giving output as we wanted .That test function is now updated on countrydemo. And we can also test there to verify out api output.

Hello Sir/mam,

After discussion with Shweta and Supriya mam i was going to make a new change to check the e-code before passing the data to easy hr.

But when I discussed with Kailash sir, we found that there is 3048 Employee available in pms and we cannot check each of them one by one and also we don't have access of easy hr for employee code. We cannot match

pms emp_code to easyhr emp_code from our side.

Date & Time : 11-10-2019 11:19:AM

We uploaded that change to live but the query has no date limit for sending data to EasyHR and that data has gone too easy hr through our testing server because we asked that URL last time for testing.

And From last time there was an issue with easy hr where we were not getting employee code which has an error because error showing with only one common static line that is why Kailash sir told me to request easy hr to modification for this functionality.

But still, things are the same. Please take Kailash sir too during concall with Easy HR Team

Hi Jayant,

As discussed, please show the the data which is passing through API in Productivity MIS.

Share the tentative date.

Posted By : Jayant Singh

Assigned To : Dipika Yedge

D199

Date & Time : 18-11-2019 02:28:PM

As Discussed with MANAS SIR,

these are the few changes neede in Easy HR module :

- 1.. Create another table in the database.
- 2.. Store all data before sending in Easy HR to the new Table.
- 3.. Put columns like Total cases, assigned cases, completed cases, Remaining cases, and Empp_code.
- 4.. For the productivity MIS report, we will create another menu.
- 5.. Changes in Coding will be required for productivity MIS and Easy Hr.
- 6.. We will put a date wise search button to view data in the view report.

As I can see here I have to do changes in the database and coding both places and for this, I will take this week to finish it.

Start Date : **19/11/2019**

End Date : **23/11/2019**

Posted By : Jayant Singh

Assigned To : Dipika Yedge

D199

Date & Time : 21-11-2019 09:53:AM

Development is on the way:

- 1.) Now we are done to store data during the transmission process.
- 2.) Pending collum and putting a value on it is done.

- 3.) Count miss-match solved after getting proper output during testing with the database.
- 4.) Changes in code and query both done

-
- 5.) Apply mathematical logic in pending column for adding previous day value is on working.
 - 6.) Threw Report Creation a new MIS report is on waiting due to the current task.

NOTE :

Today and tomorrow Shimbi will be busy with discussion on Vulnerability Assessment and Penetration Testing (VAPT) and that is why the deadline for this task would be increased too.

Ask Siddhartha sir if PAMAC Mumbai has any doubt in this.

Posted By : Dipika Yedge

Hi Jayant,

Please close this task as per deadline as we have some commitments with Ops team.

Dear Siddharth Sir & Kailash Sir,

Please consider the request.

Posted By : Jayant Singh

Assigned To : Dipika Yedge

D199

Date & Time : 22-11-2019 11:01:AM

As per Discussion with Kailash Sir,

First day: Total Cases = Assigned cases

Assigned = Fetch from Database

Verified = Fetch from Database

Pending = Total Cases - Verified cases

Next day: Total Cases = Assigned cases + Pending Last

Assigned = Assigned from database

Verified = Fetch from Database

Pending = Total Cases - Verified cases

Note : Total case and the assigned case will never be the same, it will be the same only last day pending will be zero.

Hello mam,

Need discussion on this task as per we have checked the current api code and Sir Kailash post above, it is not the same.

Please fix a time tomorrow to discuss on the same.

Hello mam,

As discussed following are the queries and points regarding api for employee master data add/update from easy hr to pms :

1) Change is for only country India.

Query 2) Need Fields which will be send from Easy Hr for Employee master, either in post or json format via api. Also share the format.

2) We will provide a url (endpoint) where they can post data for add or update any changes from Easy hr Employee master.

3) Designation and Password for the api employee in pms will be set manually

4) Only data from api will be updated in pms , rest will remain blank.

Query 5) Need contact information for any person related to the development of send api in easy hr.

Hello mam,

Can you share some sample data also , together with the key and value mapped.

Our Country demo server end point to receive employee data :

END POINT URL : <https://country-pamac.urdemo.net/pamacapi/easyHrPmt/receiveEmp>

API Key : 54672e60032d59d914a8be3e0b94b51d

Json Format :

```
{
  "api_key": "54672e60032d59d914a8be3e0b94b51d",
  "employee_data": [
    {
      "zone": 23,
      "center": 24,
      "sub_center": 25,
      "employee_code": "xxxx",
      "employee_name": "xxxx xxxx",
      "dateofbirth": "yyyy-mm-dd",
      "dateofjoin": "yyyy-mm-dd",
      "dateofresignation": "yyyy-mm-dd",
      "dateofleaving": "yyyy-mm-dd",
      "mobile_phone": "9876543210",
      "activity": 13,
      "client": 14,
      "product": 15,
      "pannumber": "xxxxxxxxxx",
      "accountno": "xxxxxx"
    }
  ]
}
```

Note : Also we will receive data in json format and a api key will be provided similar to standard api. But here it will be fixed. Sample Employee table field name and values is attached in excel, please check.

Date & Time : 02-03-2022 05:08:PM

Hello mam,

As discussed today current changes will be reverted since this api will be used only for fetch and not push.

New api will be designed again as per today's discussion.

Hello mam,

Changes for Part 1, sync easy hr api employee data in Employee master is done and uploaded in demo server. Please check and confirm.

Also need to test more before final update in live server.

Date & Time : 29-03-2022 04:17:PM

Hello mam,

Changes are updated in live server for India, db changes done in both India and Dubai to keep employee table in sync.

Added required procedure query in live server India only.

But cron will run for India only every night at **11:00 pm**. Also cron **documentation** is updated for reference in myproject discussion and closed .
