Employee master & Employee assign | High

Refer attached screen shot, web login and mobile login is shown as radio instead of check box.

Employee assigned successfully is not seen in employee assign menu

Checkno instead of radio in employee assign add page

Employee assign_master.zip

As discussed on skype, i have checked and it is resolved.

What was the issue and what did we do for resolution?

Issue happened due to a comment present in meta table for casetails , a newly uploaded module in live which had multiple checkbox for VT , created from meta table. The comment showed flag 5 for radio buttons and 4 for checkbox. But in add.php 4 was treated as radio button instead of 5. As such when Client details module went to

live new master json files were created which considered all fields with type 4 as field_type (radio) as checkbox.

After reverting back the changes and only making changes in client details meta table to consider the field_type 4 as radio instead of 5 ignoring the field comment, the issue was resolved.

I hope and trust that we check existing logic and ensure current system is not affected while we add new modules.

Yes, thorough testing is required from both end.

Can we close this point.

Entire system with all the menus have to be checked everytime a new change is implemented? Dependent and independent both changes?

Only the dependent once. Mostly the once related to master will require thorough testing.
