PDF Template not shows the list | Emergency

Today i not seen any template variable list in pdf design menu.

It shows the only CKEditor, Global Template,Pdf Template Name and description.

Why this happen, please give justification first and solve the issue.

Thanks,
Rahul Naik

Actual issue was,fields table did not showing on edit of pdf template design only.

On add new page whenever we change template from dropdown it was showing fields table properly, even in edit page it also working properly if change template from dropdown.

Issue was only if default value was selected.

Now, Issue has been resolved.

Please verify it.

After some change in master add(view) page,one line was missing at the time of calling onchange functions.

Thanks,
Rakhi
