Ramakrishnan V | AWS demo server same as country demo

Hello,

This thread is to discuss for the new demo servers of Live India and Dubai.

country-pamac.urdemo.net server will be discarded once setup is complete and confirmed from both side.

Date & Time : 14-02-2023 03:10:PM

Note:

1) As per discussion with Shimbi team 2 new domains will be used for demo which will have country demo application running in them.

2) Both the demo servers will be hosted in the same server as their Live application in order to keep the server environment same.

3) New mobile apk are to be generated for demo India and demo Dubai as their domain names will be different now. This apk will be copy of current country-pamac.urdemo.net server only URL change.
VAPT points must be present in the apk.

4) Code deployment process will change - on push from local demo application code will be deployed on both India and Dubai demo server at once via bitbucket.

5) Demo server currently is available for India only: <https://demopms.resoftech.com> which is a copy of country-pamac.urdemo.net application.

Hello team,

Currently as discussed with Sir Siddharth and Sir Kailash yesterday : **country-pamac.urdemo.net** domain will now be used to upload new ci3 v3.1.13 and php version 8.1 changes.

Also test will be done in **country-pamac.urdemo.net** for version update.

As such now we have total 3 repo to maintain - (**git, bitbucket**)

1) pamac_demo

2) pamac_live

3) pamac_stagging_230327

Also any changes done by Prasad on **pamac_demo** must be synced with **pamac_stagging_230327**.

Hello team,

As discussed today with Shimbi team below is the process of Ci3 and php 8.1 version **upgradation** -

1) pamac_demo and pamac_live - Only Prasad will push changes to these repo.

2) pamac_stagging_230327 - Only Manas will push changes to this repo.

Once Manas **upgrade process** is completed for both Ci3 and php and tested in **country-pamac.urdemo.net** from both SHIMBI and PAMAC and confirmed.

All changes from **pamac_demo** repo till that date from **27/03/2023**

will have to be synced with **pamac_stagging_230327** . Any issue if found will have to be resolved then.

After that **pamac_demo** will be synced with all final changes from **pamac_stagging_230327** and **pamac_stagging_230327** will be **discarded**.

Finally there will be 2 copies only - pamac_demo and pamac_live .

Let us know in case of any suggestions.

Hello team,

Please note that **country-pamac.urdemo.net** domain **php** version is updated to **8.1**

And also DB sync is done for changes which were not there as we were planning to stop this domain as mentioned in earlier posts.

Hi

From the PAMAC team there is no issue in keeping copies for upgradation process and later merge to production using a specific process flow.

However, please confirm:

"pamac_demo and pamac_live - Only Prasad will push changes to these repo." whether Prasad has been given rights to both pamac demo pamac live to push changes to these repo.

Hello sir,

Yes he has rights to push in both the git repository (pamac_demo and pamac_live) only.
But not in any server (**demo, live**).

Push to demo and live server are done from our end once code review is done, including db related changes.

Hi ganesh

If pushing into server is with Bhavana along with review and database review, please let me know why there should be one review by me and then by bhavana. My review becomes redundant.

I therefore, suggest a) i stop review from my side (let bhavana alone do it) or b) Prasad should not only have the rights to place in repository but should also be able to deploy (if i do the review).

For the time being, till all credentials are received, we can ask Bhavana to continue with review and placement and i can stop my review.
