Hello mam,

I am checking this issue with case id, there is some character validation error for a field but it is not showing in view page for that field.

Hello mam,

As per checking the code there is 2 latitude and 2 longitude fields also showing in the form. Did you make them editable to Supervisor ?

Hello mam,

Issue was occurring because of field " **Reasons for not recommended/referred** " in template "SVC Bank BV-sal". There was special character error for field checkbox options "Application doesn't work here" which was selected but was causing issue on form validation.

I have updated the template design and changed the option to "Application does not work here" and now as such i was able to close and save the case.

Also for other options related to this field , please remove the special characters.

Please close bug if done.
