Field type & Validation error | Medium

hi,

- 1) in templates where the field type is selected as date and there is no input in the field by the FE, then the export report reflects date as '000-00-00'.
- 2) Similarly where the field validation is selected as 'numeric' and no input by FE then the export report reflects '0' in the field value.

In case of no input to any field, irrespective of the validation (except a mandatory field), the report should reflect blank and the system data should also store data input as blank instead of '0' or '0000-00-00'

Regards,

Navika

Rahul,

please send me XML file which is send from mobile device to web-service.

in web-service we written code (blank and "NA" replace with NULL).

in one case please send empty value for date and numeric fields and provide us XML.

Thanks,

Kailash
