Pincode master query

If we have two subcenters Andheri & Wadala under center Mumbai, zone West.
I have added pincode 400031 in pincode master as West<Mumbai (without subcenter).

When a case is added with the pincode 400031, will it be visible to Andheri & Wadala users?
Or will it be seen only to the users who have West<Mumbai (without subcenter) rights assigned?
