(All Members) | Quality check | Low

Hi,

As discussed with Kailas Sir, require below changes in Quality Check module

- 1) Case id will be reflect as QC- case id on both web & app
- 2) Old case details should not be seen.
- 3) Allow FE to update all details (like fresh cases) including photos, map etc.

Date & Time : 24-04-2019 11:43:AM

Hello,

This change will require webservice changes for mobile application as well as changes in mobile app.

As per earlier discussion, QC- prefix is shown in mobile app for case ids, which are of QC .

Queries :

-
- 2) Old case details should not be seen.

Q1 >> Is this for both Mobile app and Web change. To which user(Supervisor/Fe/Tele) should the case details must not be shown.

3) Allow FE to update all details (like fresh cases) including photos, map etc.

Q2 >> Will this overwrite the current case data ? Since no new case is created during QC, same case is used for QC.

This point again will require changes in both webservice and Mobile application. Also will it be for web application change ?

Hi,

Q1 >> Is this for both Mobile app and Web change. To which user(Supervisor/Fe/Tele) should the case details must not be shown.

Ans- Yes, this will applicable to both Mobile & Web.
FE and Tele

Will this overwrite the current case data ? Since no new case is created during QC, same case is used for QC.

Ans- This will not overwrite the current data. As discussed with Kailash Sir the case id will be manage, as the case id starts with QC initials.

Discussed with Manas sir following changes to be implemented:

1) Case id will be reflect as QC- case id on both web & app (Already present)

2) Old case details should not be seen. (only for FE and TELE)
During case verification from FE/TELE old cases will not be shown.

3) Allow FE to update all details (like fresh cases) including photos, map etc.

Where to update all details, in existing table we cannot create case with same case case id nor with any initials like QC. As Dipika mam already replied

"This will not overwrite the current data. As discussed with Kailash Sir the case id will be manage, as the case id starts with QC initials".

For above need Kailash sir confirmation and for regarding point 3 need suggestion how to implement that.

Discussed with Kailash sir,

For QC case needs to reopen case since it will create new case with same details but different case id which allows update new FE/TELE submit data, since user can't overwrite data to main case details as there are only 2/3 fields which can be updated through QC process.

Need to confirm for or any other change regarding this with Deepika mam.

Hello,

As per new discussion with Kailash sir we will add option in above menus where new case is added in the system confirm from Dipika mam for which menu will be better : Re Assign , Re-do because of some fields are nullified during this process.

in order to indentify that the case is of qc and is done redo/reassign. Please call to discuss.

Hi,

4	On select any case and click on "QC" button a new case will be created with field values blank. Also system will make an entry in a log table where the newly added case id will be inserted and its parent case id also. (QC of a QC case id should be restricted.)
7	For QC related MIS let us know what is required ? (Check attached format)

9	Apart from List pages where else do you require us to show QC flag before case id ? (it should be shown in FE payout. Billing Tracker)

Hello,

As per discussion with Manas Sir on myproject (C87) and attached excel (**Date & Time :** 21-Nov-2019 09:44:19) in discussion, following are the points in doubts.

1) Point no. 1 in excel - if current quality check module is disabled how we will retrieve old cases data of existing QC module.

2) Point no. 2 - If logic remains the same what's the point in creating new changes, just to maintain QC flag ?

3) According to point 2 & 3 in myproject (**C87 Date & Time : 01-Apr-2019 17:06:29**) for FE to upload all details like a fresh case,

we need changes in Mobile App (Android Developer will be required).

4) In new QC module will there be **Fe Assignment, Tele Assignmen, Supervisor verification** like in current QC process.
