B415 Emergency

Date & Time : 22-01-2020 11:42:AM

Due to Bug **B400** , this task is still untouched. And in that Bug, there will be work on every report so that's why there will be time to close that Bug. You can put this on hold or shift me here if it is high in priority.

Hello mam,

As discussed on phone and checked using anydesk , the issue was occurring because of XSS filtering applied in pdf design report format.

The function used to remove script tags added <!DOCTYPE.. in the final html thus causing the html in pdf to break if multiple cases are exported at the same time. For a single case it works ok.

This has been resolved and updated in live server. Please check and close.
