Character limitation for Default value

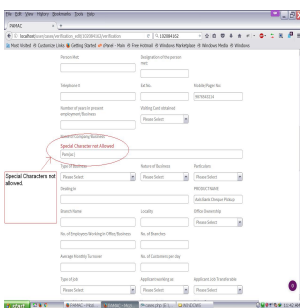

Is there any character limitation for default value for any field?

I suppose you misunderstood.

My question was - for every field in template designing, we have default value option. IN that option, do we have limit of characters set?

Date & Time : 12-07-2017 11:55:AM

As i have checked their is no fixed restriction in coding for this, it is of table, field type length. The length of field : "default_field" in the global template table is 150 as such if characters exceed 150 when user inputs data, remaining characters will be simply discarded.

Yes, we can remove this restriction. Is their any limitation of characters, you want to suggest or no limitation atoll.

500 characters are shown, however error shown in the attached screen shot is not seen while adding default text.

Yes, it is a browser restriction. If someone removes the limit of 500 from browser restriction(as it is client specific) we have applied validation server side too.

I have tested both ways to apply validation of 500 characters.
