Bhavana Pachpande | AWS Shifting

---

Hello

We have set up a staging site on AWS for PMS India

URL - <https://demopms.resoftech.com>

Super Admin Login:

-----  
demo@shim-bi.com  
Pamac@jan1

Supervisor Login:

-----  
Mytest  
Pamac2@Dec2

Everyone should use only this thread to discuss everything about the site shifting to AWS and making it ready for live.

Hello mam,

Tested with provided template, was able to complete the send to client process with success.

Google map for address to co-ordinate also working.

Following points to be noted after sync process was done:

- 1) Updated database.php file for new db password.
- 2) Update tbl\_mst\_country for country table password.
- 3) Dropped and re-generate view\_user\_dashboard, to avoid login error for Supervisor.
- 4) Added procedures queries in main table, db procedures were not synced.

To do next :

- 1) Setup cron jon, make changes where necessary and check.
- 2) Check message showing in header |

**DB Connected :: Unknown (Contact Admin for more details)**

- 3) Footer showing | **Connection :** , for Super Admin Login.
- 4) Setup bitbucket ftp push.

ok Prasad.

**Also make note :** Cron job files are all updated in live India, Dubai and Demo AWS (demopms.resoftech.com) and country urdemo demo (country-pamac.urdemo.net) server.

We have made all fixed path related changes to dynamic now.

database.php file in application/config is also updated for fixed to dynamic path.

Following points are also done and checked :

- 
- 2) Check message showing in header |  
**DB Connected :: Unknown (Contact Admin for more details)**
  - 3) Footer showing | **Connection** : , for Super Admin Login.
  - 4) Setup bitbucket ftp push.

**Pending** : Cron jon setup and test in : demopms.resoftech.com
