Hello Sir,

I tested all related things like Template Design, Template Assign ,

Import Design, Import Assign And also Pdf Design & assign.

Then I checked the database field where all data was ok so moved to Script to debug the code with the test server,

Where I test all the points I got that,

Inside the view page, there is a condition where emp\_id which came from Session is stored in array Hardcoded.

So I Put There my printed id = 435 in that array which solves the checkbox problem in the list.

So please test this and allow me to put that id on code or fix that user id.

As Discussed with Sandeep Sir,

Send to Client is allowed only for few Listed User,

If In case any user wants to do this he had to submit his empid to us and we will put this on Script to allow that Functionality to that user.

Conclusion: User was Not allowed for this Kotak Mahindra Bank client.

**View File -> User -> Export -> export\_actwise.php**

### **Bug Solved**

Hello Team,

Above issue is related to Kotak mahindra Bank API, when we develop that time we taken some user id which are responsible for do send to client.

May be above issue is face for new user id and that user id is not present in that user id's array.

So we can close this point.

I will confirm with Ganesh sir, still we are sending the data to Kotak Bank using API or not. Because in previous month we face on more issue that we doing send to client but from client we received wrong acknowledgment.

That time I discuss with Ganesh sir and he say that he will ask to respective vertical. So I need to confirm once. If not sending then we will comment that line of code.
