RCU Global | Emergency

Hi Manas,

As discussed, after saving value in import design for Voter ID, the values not getting saved.

hi,
checked in coding all proper, data is saving for some fields and not for some other fields.
process is in progress to find root cause, will let you once find it.

Hi,
As checked, it is not a bug it is due to increase fields and saving 2597 fields at a time. there was limit to save upto 2k fields at a time now increased limit. But try to reduce the form or save in steps as there is limit in the system and we have to consider it. If any confusion then discuss with kailash sir.

Note: this is temporary change, after your work complete we will revert previous setting as the system can't handle that amount of data at a time. Discuss with kailash sir after completing your work.

change:
max input var set to 11k.

Changes uploaded on live please check.
