Hi,  
Analyzed in coding, recently there was change C76 made only for Without pincode FE rate set and capture and made in multiple files, need to deeply analyze and convert that change into new change so that existing workflow and operation will not affect the new change. Consider it is big change and require some more time. Discussed same with Deepika mam and Manas sir.

Above information is for reference only.

Hi,  
issue: adding new emprate not allowing null value to emprate column, since new change contain rate in ICL,OCL etc fields so if selected categorywise then emprate is null.  
change emprate column to allow null

Query:

- ii) If "Pincode" radio button is selected and "Pincode" checkbox is checked and Rate is entered, validation error is shown "Rate field is required."
- iii) If "Categorywise" radio button is selected then atleast one Rate field value must be added.
- iv) If "Pincode" radio button is selected and "Pincode" checkbox is not checked, and rate is entered it saves.
