Unable to edit import template Axis Bank CC RV_BV_RT_BT | High

Changes made by the user to the import design template are not being saved for Axis Bank CC RV_BV_RT_BT

Issue have been resolved.

Please verify it.

This happened because there is limitation to form input values.

By default it allows 1000 input values in POST array of a form. In import template 'Axis Bank CC RV_BV_RT_BT' It was exceeding the limit (each row in form having 4 fields with including hidden fields), so the fields above 1000 not getting updated.

Previously we have changed the limit size from 1000 to 10000.

But after shifting domain it was reset with default value i.e. 1000.

Now, again we have changed the limit to 10000.
