Super Admin | pmsdubai domain is active

---

<https://pmsdubai.resoftech.com/>

Task need to be done  
Drop India DB  
Drop all India images  
Remove all India related references  
Test once

As per discussion There is no common login.  
All operations are separated.  
Database structure and code will be same.  
better to push same coding files in both domains.  
Mobile will be separate with new domain name.

Hello sir,

I have made necessary DB changes and updated PAMAC live application in Dubai domain now both of the application are in sync and also setup bitbucket deployment process.

I have also discussed with Android developer for mobile app related changes and will discuss today for development process and development completed date today. Will include Sir Kailash in this discussion also.

Meanwhile i will set cron changes for Dubai domain only as discussed with Sir Kailash.

Now Dubai user can login in the new Domain created. For Pamac India domain i have not yet disable the Dubai login , will do it once confirmation is received.

Hello team,

As discussed with Sir Kailash for India and Dubai server separation, whenever new ids(primary key) for employee master will be created on the system for both servers there is chance of primary key i.e ids of employee from both servers to be same as now different tables are now used for employee.

Case id and rest master ids some are already same for both countries as different database and tables are used in same server for country India and country Dubai.

Also following api keys/username:password are same in both server :

- 1) Google Map Api key,
- 2) SMS gateway username and password

Please confirm on this.

**Date & Time :** 16-12-2019 04:37:PM

Same employee id and case id will exist in both dubai and india database from now onwards.

Merging of both countries data will not possible in future.

Please confirm both points.

Hello mam,

I have checked issue was because of "views" tables were not copied from pms.resoftech.com to Dubai database. We have manually added them using script. Please check now.

Hello,

Wep app changes are done. But pending confirmation of web app from PAMAC team also for android app changes no any update received yet.

Mam Dipika please ask android developer to post changes or updates here in this thread related to any queries or webservice changes if required from our end.

All members kindly make note from pour side Dubai server is up running ready to use as production server.

Further delays should not be attributed to Shimbi Team.

This deployment delayed because we got respond 3 days back.

We are going live on 15th as promised.
