Dipika Yedge | Digital Verification

---

As you aware currently our all field activities are stopped and we are looking for the digital verification process during the lockdown process to conduct the digital verification will be as below

- Supervisor will received cases from client and upload in the RES
- There should be option to upload the name of the applicant and mobile # in the user master.By default Applicant role to be assigned for these users wherein user can only view and update the details / upload image
- Supervisor will assigned cases to applicant
- SMS should get initiated to applicant on the mobile # with link and user ID and password to update the details
- Applicant will refer the link and user ID and password to access
- Client and product wise template will be visible to applicant
- Applicant will be update the details and upload the required documents / imanges
- Latitude and longitude should get captured basis of the images uplaod
- Once the case update by applicant it will reflect in supervisor tray for the QC
- if no query case will get marked as send to client by Supervisor. Once case marked as sent to client user ID and password should automatically deactivate
- PDF report will get generated

Please let we know whether you can give such module and if yes what will be the time.

**Date & Time :** 04-05-2020 04:05:PM

Hello sir,

As discussed with Dipika mam currently we are going to develop as per R100 post.

For this point will have to prepare a proper flow and changes to be made and update development time on that basis.

Without knowing how many modules are to be added or modified to get this point done we cannot update any development time yet. Will need a thorough discussion on this including Mam Dipika from PAMAC team.

First let me prepare the flow and changes and queries if any. Once done i will post here.

**Date & Time :** 13-05-2020 11:27:AM

**Shimbi Remarks:**

-----  
1) Supervisor will received cases from client and upload in the RES.

**Reply :** OK

2) There should be option to upload the name of the applicant and mobile # in the user master. By default Applicant role to be assigned for these users wherein user can only view and update the details / upload image

**Reply:** No need to create new module "**User Master**". We will add 2 fields in the form for applicant mobile number and email address if any. These fields will be filled up by Supervisor or at the time of import the case in the system with Applicants actual data and either of them will be required or both suggest here regarding required.

3) Supervisor will assigned cases to applicant

**Reply:** Yes, on case edit, we will add a button to assign case to applicant. On clicking that button , system will search for the fixed field i.e mobile no and applicant email if any, and if the fields are not found or data is not filled validation will be shown to Supervisor.

On validation success , sms and email will be send to that applicant containing a unique link which will open a temporary form to be filled by the Applicant. Field **assign\_status** will be '**Assign**' for that case.

4) SMS should get initiated to applicant on the mobile # with link and user ID and password to update the details

5) Applicant will refer the link and user ID and password to access

**Reply :** SMS will be send with the unique link to the form. No user id or password required to login to access this form. Since its unique link and will be send to personal email or mobile no. SMS format will be same for all , and will use the same SMS gateway as that of Auto SMS/Email. Please suggest if you have any other SMS

gateway setup for this.

5) Client and product wise template will be visible to applicant

**Reply:** The form send via unique link will be the same form designed for Fe for that template. Accept that the Fe Remarks field won't be shown to the applicant. Please make sure that the FE remark field is same in all the template designed. As we will use it to avoid showing it in Applicant's form.

If there are any other fields which are for Fe only and not for Applicant let us know. But they need to be fixed.

6) Applicant will be update the details and upload the required documents / images

**Reply:** Yes

7) Latitude and longitude should get captured basis of the images upload

**Reply:** Latitude and Longitude capture will depend on the geolocation support of the browser the applicant is using in their system and not image upload. It will be capture when form is submitted.

8) Once the case update by applicant it will reflect in supervisor tray for the QC

**Reply:** Once the form is submitted by Applicant then, it will be present in the case verification list of Supervisor. Fe related fields like **assign\_status** will be captured as '**Verified**'. fe\_id will be blank and also fe\_submit\_date will be blank.

9) if no query case will get marked as send to client by Supervisor. Once case marked as sent to client user ID and password should automatically deactivate.

**Reply:** Unique Link send to the applicant via sms or email , will expire once he submits the form. If edit is required by Applicant again, then Supervisor has to edit the case and again click on the button to assign case to applicant with newly generated link.

10) PDF report will get generated.

**Reply:** This will be same as per the rest of the process, like Supervisor closes the case, send to client the case , download zip containing pdf.

**Note :** Sir Kailash, please confirm above process as per today's discussion , suggest your points if any or correction required. Once done will inform to PAMAC team also for confirmation before development can start.

**Date & Time :** 13-05-2020 05:12:PM

As R100 is closed, changes are reverted for R100 in local copy for both demo and live.

In live server tmpfe\_id field will remain same, as it is of no use, it won't affect any other modules. So no revert there. We can use this field for any other task if and when required later.

**Date & Time :** 14-05-2020 01:30:PM

1) Supervisor will received cases from client and upload in the RES.

**Reply :** OK

2) There should be option to upload the name of the applicant and mobile # in the user master. By default Applicant role to be assigned for these users wherein user can only view and update the details / upload image

**Reply:** No need to create new module " **User Master** ". We will add 2 fields in the form for applicant mobile number and email address if any. These fields will be filled up by Supervisor or at the time of import the case in the system with Applicants actual data and either of them will be required or both suggest here regarding required.

PAMAC : Currently user master used to update the user details and assign rights, cases uploaded by Supervisor will have applicant mobile number. If module not separate then all the cases uploaded by the Supervisor will reflect in the User Master which we don't want as the requirement will basis of the request received from Vertical / Client

We hope you will allow applicant to view and edit only his case basis of the mobile #

3) Supervisor will assigned cases to applicant

**Reply:** Yes, on case edit, we will add a button to assign case to applicant. On clicking that button , system will search for the fixed field i.e mobile no and applicant email if any, and if the fields are not found or data is not filled validation will be shown to Supervisor.

On validation success , sms and email will be send to that applicant containing a unique link which will open a temporary form to be filled by the Applicant. Field **assign\_status** will be ' **Assign** ' for that case.

PAMAC : For case edit option, Supervisor will have to click each individual case which will not be possible as count of 200 to 300 cases in a batch

4) SMS should get initiated to applicant on the mobile # with link and user ID and password to update the details

5) Applicant will refer the link and user ID and password to access

**Reply :** SMS will be send with the unique link to the form. No user id or password required to login to access this form. Since its unique link and will be send to personal email or mobile no. SMS format will be same for all , and will use the same SMS gateway as that of Auto SMS/Email. Please suggest if you have any other SMS gateway setup for this.

PAMAC : Yes we have SMS gateway

5) Client and product wise template will be visible to applicant

**Reply:** The form send via unique link will be the same form designed for Fe for that template. Accept that the Fe Remarks field won't be shown to the applicant. Please make sure that the FE remark field is same in all the template designed. As we will use it to avoid showing it in Applicant's form.

If there are any other fields which are for Fe only and not for Applicant let us know. But they need to be fixed.

PAMAC : Will check but it will difficult to make it standard as it differ from client to client

6) Applicant will be update the details and upload the required documents / images

**Reply:** Yes

PAMAC : Okay

7) Latitude and longitude should get captured basis of the images uplaod

**Reply:** Latitude and Longitude capture will depend on the geolocation support of the browser the applicant is using in their system and not image upload. It will be capture when form is submitted.

PAMAC : okay

8) Once the case update by applicant it will reflect in supervisor tray for the QC

**Reply :** Once the form is submitted by Applicant then, it will be present in the case verification list of Supervisor. Fe related fields like **assign\_status** will be captured as ' **Verified** '. fe\_id will be blank and also fe\_submit\_date will be blank.

Okay

9) if no query case will get marked as send to client by Supervisor. Once case marked as sent to client user ID and password should automatically deactivate.

**Reply:** Unique Link send to the applicant via sms or email , will expire once he submits the form. If edit is required by Applicant again, then Supervisor has to edit the case and again click on the button to assign case to aplicant with newly generated link.

Okay

10) PDF report will get generated.

**Reply:** This will be same as per the rest of the process, like Supervisor closes the case, send to client the case , download zip containing pdf.

Okay

**Assigned To :** Dipika Yedge  
D215  
**Date & Time :** 14-05-2020 05:21:PM  
Hello Team,

As per today's telephonic discussion with Mam Dipika and Sir Kailash following points are to be note and updated in above process :

**Point A1)** Changes is for Country 11 i.e India only. Since code is same now for both India and Dubai Domain will use session to manage this functionality. And yes Task List needs to be update where PAMAC team will add the changes are for India or Dubai in a separate column.

**Point A2)** In reference to above point no. 3 for **PAMAC reply :**  
PAMAC : For case edit option, Supervisor will have to click each individual case which will not be possible as count of 200 to 300 cases in a batch

**Shimbi Reply :** We will add a button in Case Verification List "Assign to Applicant", here maximum 50 cases will be able to select by Supervisor and not 200 to 300 because it will break the script if so many data is processed at the same time for sending sms and email. After send the assign\_status will be "**Assign**" and color of row will also change after page i reloaded for that case. If any error it will show in top.

**Point A3)** In reference to above point no. 5 for **PAMAC reply :**  
PAMAC : Will check but it will difficult to make it standard as it differ from client to client

**Shimbi Reply :** It has to be fixed as if not then PAMC team will have to redesign the form again using Template Design to assign fields to new Designation Temp Fe.

Please search and provide us the field names only which we won't show to Applicant.

**Point A4)** In reference to above point no. 2 for **PAMAC reply :**  
PAMAC : Currently user master used to update the user details and assign rights, cases uploaded by Supervisor will have applicant mobile number. If module not separate then all the cases uploaded by the Supervisor will reflect in the User Master which we don't want as the requirement will basis of the request received from Vertical / Client

**Shimbi Reply :** No need for User Master. We will use template design fields as discussed. Please confirm on this for any query discuss with Sir Kailash.

Please confirm above points, any delay will aslo delay in development schedule.

Also please provide us SMS gateway details also.

**Date & Time :** 15-05-2020 01:59:PM

As per today's discussion with Sir Kailash for

**Points A1,A2 and A3** are confirmed from PAMAC, for **point A4**, in reference to Sir Ganesh query regarding how will we know who submitted the form whether Fe or Applicant, we can check this in case history as fe\_id for these cases will be blank, rest fe\_submit\_date,assign\_status , fe\_submit\_latitude and fe\_submit\_longitude will be updated.

Also in case if you require any other mis for these cases we can create one. Since fe\_id is blank they won't show in Fe payout also.

PAMAC team please acknowledge above mentioned statement.

Hello mam,

1) As discussed on phone mobilenos and e\_mail fields will be used for sending sms and email with unique link to applicant.

2) Email and Mobile number can be multiple in same field i.e comma separated. In this case if even a single sms or email is sent successfully will consider it as success.

#### **Requirement:**

1) As discussed please provide us the sms and email format that will be sent to Applicant.

2) Also provide us the SMS gateway, i.e SMS Gupshup api username and password. And create a template in SMS gupshup also.

**Posted By :** Bhavana Pachpande

D215

**Date & Time :** 22-05-2020 10:28:AM

Hello mam,

**Point 3)** After Assign case to applicant from Case Verification List, the list will reload with color change for Failed cases where sms/email are not sent. Color is fixed as orange. If any other color is required please suggest.

**Point 4)** Assign case and sms and email send success/fail flag is captured in case history.

**Point 5)** In case edit also you can see a assign case button. Here you can get the detailed validation error

message also.

Please confirm above points and also provide us with :

**Requirement:**

- 1) As discussed please provide us the sms and email format that will be send to Applicant.
- 2) Also provide us the SMS gateway, i.e SMS Gupshup api username and password. And create a template in SMS gupshup also.

Hello mam,

Changes are uploaded in country demo server. Please test from your end also in case of any issue will fix it by tomorrow and upload changes on live on 29-05-2020.

Also since we did not receive any SMS/Email format , we shall be using the default format currently in use and the sms sending error will be always present as we did not receive any SMS gupshup username and password and SMS template set in SMS gupshup.

Please provide us the details by tomorrow afternoon so that we can make final changes and upload in live server, otherwise sms won't work in live server.

Hello mam,

As discussed it is not a mobile application, as such turning on the gps location won't work. You have to go to browser settings > Site Settings and enable location access for browser itself there.

Also as discussed new added points please note:

1) Image upload size increased upto 10 MB each.

2) Assign Status in List page of Case verification changed from "Assign" to "Send"

**Posted By :** Bhavana Pachpande**Assigned To :** Ganesh Sawant

D215

**Date & Time :** 29-05-2020 03:55:PM

Hello,

As discussed with Dipika mam, please ask SMS gupshup operator to modify the sms template from :

>> Dear Customer, with reference to your application with 123 for the 123 Product, please click on the URL 123123 and update all the required details and submit the documents.

to

>> Dear Customer, with reference to your application with 123 for the 123 Product, please click on the URL <https://pmsdubai.resoftech.com/se/>123123 and update all the required details and submit the documents.

We have found that whenever we are trying to send SMS with a replaced link of more than 40 characters for 123123 in the sms body then sms send error occurs. So we need to fix the domain url as mentioned in the above message, so that only the dynamic part gets replaced. Also as such sms part won't work in "<https://country-pamac.urdemo.net/>" so it needs to be tested in live directly.

Please check with SMS gupshup operator regarding this issue and as them if there is any limit in link replacement in sms body.

-----

--

Test case in country demo server :

-----

1) Not working :-----

Dear Customer, with reference to your application with Bank of Baroda for the Auto Loan Product, please click on the URL <https://country-pamac.urdemo.net/se/yzuussuvw-4kDYH> and update all the required details and submit the documents.';

2) Working :-----

Dear Customer, with reference to your application with Bank of Baroda for the Auto Loan Product, please click on the URL <https://country-pamac.urdemo.net/se/yzuu> and update all the required details and submit the documents.

Hi,

**Requirement :**

i) Please provide us the support email address to be shown in applicant form.

- as discussed with Ganesh Sir, support email address will be VT wise.

For EBC- [krutika.chaudhari@pamac.com](mailto:krutika.chaudhari@pamac.com)

Hello mam,

As discussed earlier email id was fixed for all now this new change will take some extra modification in current email id code.

Which will again increase development time. If there are any more changes then we won't be able to push on live today.

D215

**Date & Time :** 25-06-2020 01:07:PM

Hello mam,

As discuss will update you final development days once the 5th point is confirmed from your end. Also for 4th point Sir Kailash will discuss with Sir Ganesh.

- 1- Location services should be enable before opening the form
- 2- Google co-ordinates through address. (**Please provide us fixed lat and long field names from tbl\_cases**)
- 3- Visibility of form
- 4- Video uploading facility
- 5- Show google link below google image capture in verification edit

Will work on above points in the following order :

-----  
O1- Visibility of form

O2- Location services should be enable before opening the form

O3-Google co-ordinates through address. (**Please provide us fixed lat and long field names from tbl\_cases**)

O4-Show google link below google image capture in verification edit

O5-Video uploading facility.

Tomorrow i will start on : O1 - Visibility of form

**Posted By :** Kailash Kumawat

**Assigned To :** Ganesh Sawant

D215

**Date & Time :** 25-06-2020 02:31:PM

4- Video uploading facility

Server will allow maximum size 50 MB.

It depends on users mobile device.

Let me know the expected videos uploaded by all users in a month to estimate proper server space.

Do you want to upload video through mobile app and web app both?

**Posted By :** Manas Dasgupta

**Date & Time :** 30-06-2020 08:56:AM

Hello mam,

Point O1 and O2 changes are uploaded on country demo server, please check and let us know if any more change is required here.

Also as discussed for new responsive design of form , the Position part in Template design won't work as of current functionality. Position > Column means width of the input field : 1 => Full, 2: Half, 3:Quarter

Please create a sample template, add new case and check with all possible fields in mobile and desktop both.

**Posted By :** Bhavana Pachpande

**Assigned To :** Dipika Yedge

D215

**Date & Time :** 30-06-2020 09:29:AM

Hello mam,

Following pints are discussed with Sir Kailash for point-O5 Video upload functionality :

- 1) In template Design a new field type will be added as "Video"
- 2) Size of video for uploading via form will be 50MB max. Three types of video will be allowed only will check and update what types are commonly used in mobile phone.  
(Will check this in different mobile device for 1,2 and 3 min video and let you know. Please check from your device also the more data we have better for size estimation.)
- 3) Video link will be shown after upload is successfully done same as **pdf** both in send to client , and case edit/view.
- 4) Video upload will take time depending on the size when the case form is submitted as such we will have to check if we can use some other function like ajax to upload the video first and then submit the form.
- 5) This change will be applicable to both India and Dubai domain as coding is same in all. Depends on user to use the field type in template design or not.

Note: Addition changes to take place and to be discussed

-----

- i) Backup and restore process of video files.
- ii) Cron job delete process of video files.

Hello,

### **O5-Video uploading facility.**

I have checked video of different length 1,2 and 3 min in my mobile(Asus Zenphone Max) at a resolution of **1280 x 720** pixel. Android version : Marshmallow (6.0)

1 min : 103 MB,

2 min : 234 MB,

3 min : 368 MB.

Hope this helps, please check the same in your mobile also to narrow down for average video upload max size. So we can discuss on this point further.

D215

**Date & Time :** 10-07-2020 05:34:PM

Hello mam,

Please note below changes. If any query please post here.

1) **imei\_number** field used for capturing google co-ordinates from address field is changes from type int(11) to type text in both local and demo server.

2) This change will be applied for both India and Dubai domain. You can control it from Template Design.

3) The google api key used in demo server is not working , as such changed to live api key for testing.

D215

**Date & Time :** 20-07-2020 08:16:AM

Hello mam,

As discussed please let us know if this point is checked and can we prepare files to upload on live server.

Also what is the final output of **point-05** - Video upload functionality.

**Posted By :** Bhavana Pachpande

**Assigned To :** Dipika Yedge

D215

**Date & Time :** 21-07-2020 04:59:PM

Hello mam,

As per new discussion for D215 point-03 change, to show google co-ordinates from address field in pdf download, export and send to client pdf , doc and excel also.

Please confirm above changes. Also changes are pushed to country demo server for you to confirm.

**Posted By :** Dipika Yedge

**Assigned To :** Bhavana Pachpande

D215

**Date & Time :** 21-07-2020 05:58:PM

Hi Manas,

As discussed with Ops team require google lat / long coordinates and link in separate field.

Please check pdf design id- 764

Login- Mytest

Password- pamac@june

Activity- EBC

Case ID- 105577550

**Posted By :** Bhavana Pachpande

**Assigned To :** Dipika Yedge

D215

**Date & Time :** 22-07-2020 08:25:AM

ok mam.

Also please discuss with Ops team if same field used for google co-ordinate capture from address, can be used to show the lat and long and the google url.

Additional will add above requirement also. This will increase development days by 1 till demo server.

**Posted By :** Bhavana Pachpande

**Assigned To :** Dipika Yedge

D215

**Date & Time :** 22-07-2020 12:33:PM

Hello mam,

As discussed changes are reverted for same field used to show google co-ordinate capture from address, and the google url.

For google link if required in the pdf or excel, please let us know after discussion with OPs team, this will require changes in code.

**Note :** As discussed, won't change in coding as such follow below process :

1) Please add '**Address Latitude**' and '**Address longitude**' in template design for the field value to be captured in pdf, doc and excel export.

2) Make sure that these 2 fields are not editable or viewable in the form or app. Just add them.
