Dynamic Case Images in PDF

---

Hello sir;

As per discussion with Kailash Sir , new changes are to be made in PDF Export Design. to new input fields will appear after "Password for PDF Report" as **Case image width & image height** . This 2 new fields will not be Required .

Here, one can input case image height and width which will be used to create thumbnail and will be downloaded in the PDF . As such this change depends on PDF Export Design .

By default if no input for width and height is found then the default ( already exist's )height and width will be used for Thumb image.

Please Confirm before development. It will take 5 days for the changes.
