(All Members) | Remove any unused fields from tbl\_cases

---

Please check on this and aslo ask Dharmendra to study the database (demo) and confirm.

4) Suggestion for PAMAC team: Remove any unused fields from tbl\_cases using field master menu.

This will reduce the number of columns present in tbl\_cases table.

Check template design and remove the fields.

For this requirement I need Dharmenrda's help and right now he is working on R139.

After that we will work on this task.
