Dipika Yedge | Skip dedupe search | High

Hi Manas,

as discussed, skip dedupe search in import for particular logins.

ok mam, will sync yesterday changes today.

But for making it dynamic need to discuss where to put the option for every login.

Hello,

As discussed with Manas sir following are the scenario and criteria to be considered before starting any development,

Checkbox should be given to:

1) Designation master

OR

2) Employee Master

OR

3) Both Designation and employee master.

To skip dedupe search for a specific login there are three scenarios (the below criteria are based on checkbox checked in master):

1) Skip for specific designation(eg. supervisor):

In this scenario dedupe search for employee with designation supervisor will be skipped.

2) Skip for specific employee:

In this scenario dedupe search for that specific employees will be skipped.

3) Skip for both employee and designation:

In this scenario we have to first check dedupe search ticked for a specific employee and also for designation.

Case 1:

If both are checked (i.e designation and employee), then skip dedupe search.

Case 2:

If designation not checked and employee checked, skip dedupe search.

Case 3:

If designation checked and employee not checked, dont skip dedupe search.

Hello maam,

Started working on above requirement:

Process :

1) A checkbox to be given in employee master - "**Skip dedupe search**".

2) If checkbox is checked for a particular employee, then dedupe search option for that particular employee will not be shown. Directly "**save**" button to import cases will be visible.

3) Dedupe search for that employee will not be applied.

Please confirm above process.

Hello,

As discussed with Dipika maam and Ganesh sir, we don't need above changes.
So need to revert back all the changes done in local server.

Please confirm so that i can revert back all the changes done before proceeding.
